Cautionary Note

This presentation contains “forward-looking statements” within the meaning of the United States private securities litigation reform act of 1995 and “forward-looking information” within the meaning of applicable Canadian securities legislation. Such forward-looking statements and information herein include, but are not limited to, statements regarding Endeavour’s anticipated performance in 2021 and future years, including revenue, cash flow, operating and capital cost forecasts, silver and gold production, timing and expenditures to explore and develop new mines and mineralized zones, silver and gold grades and recoveries, cash and all-in sustaining costs per ounce, initial and sustaining capital expenditures, and the use of the Company’s working capital. The Company does not intend to, and does not assume any obligation to update such forward-looking statements or information, other than as required by applicable law.

Forward-looking statements or information involve known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Endeavour and its operations to be materially different from those expressed or implied by such statements. Such factors include, among others: uncertainty of the ultimate impact of the COVID 19 pandemic on operations, fluctuations in the prices of silver and gold, fluctuations in the currency markets (particularly the Mexican peso, Canadian dollar and U.S. dollar); fluctuations in the price of consumed commodities, changes in national and local governments, legislation, taxation, controls, regulations and political or economic developments in Canada and Mexico; operating or technical difficulties in mineral exploration, development and mining activities; risks and hazards of mineral exploration, development and mining (including environmental hazards, industrial accidents, unusual or unexpected geological conditions, pressures, cave-ins and flooding); inadequate insurance, or inability to obtain insurance; availability of and costs associated with mining inputs and labour; the speculative nature of mineral exploration and development, reliability of calculation of mineral reserves and resources and precious metal recoveries, diminishing quantities or grades of mineral reserves as properties are mined; risks in obtaining necessary licenses and permits, global market events and conditions and challenges to the Company’s title to properties; as well as those factors described in the section “risk factors” contained in the Company’s most recent form 40F/Annual Information Form filed with the S.E.C. and Canadian securities regulatory authorities

Forward-looking statements are based on assumptions management believes to be reasonable, including but not limited to: the continued operation of the Company’s mining operations, no material adverse change in the market price of commodities, mining operations will operate and the mining products will be completed in accordance with management’s expectations and achieve their stated production outcomes, and such other assumptions and factors as set out herein.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or information, there may be other factors that cause results to be materially different from those anticipated, described, estimated, assessed or intended. There can be no assurance that any forward-looking statements or information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements or information. Accordingly, readers should not place undue reliance on forward-looking statements or information.

Investor Highlights

MID-TIER PRODUCER

Two high grade, underground silver gold mines in Mexico

OPTIMIZING OPERATIONS

Reducing operating costs, boosting free cash flow

ORGANIC GROWTH

Best organic growth profile in silver mining sector

DISCOVERING NEW OREBODIES

Track record of virgin discoveries to expand resources

BEST SILVER LEVERAGE

Pure precious metals producer with sector leading beta to silver

ACQUIRING KEY ASSETS

Opportunistic mergers and acquisitions

Mexican Assets

Guanacevi

- Cornerstone silver mine in Durango
- Produces dore bars

Bolanitos

- Gold mine in Guanajuato
- Produces gold and silver concentrate

El Compas ⁽¹⁾

- Suspended gold mine in Zacatecas
- Management evaluating value opportunities

Terronera

- District scale development project in Jalisco
- Large, Low cost mine potential

Parral

- Historic silver mining district
- 4 mineralized areas

+2,200 employees & contractors across Mexico

\$147 million working cap, minimal debt and strong balance sheet ahead of Terronera development decision

2020 Sustainability Highlights

2020 was a year of global challenge, however we united in the face of adversity. We augmented standard safety procedures with COVID-19 protocols to protect our workforce with minimal disruption to the business and distributed 2,200 COVID-19 tests and personal protective equipment (PPE) to local Mexican households and health centers.

HEALTH & SAFETY

Achieved a **25% reduction** in the Reportable Injury Rate

Implemented an employee empowering Safety Culture, "Te Cuido"

OUR PEOPLE

Provided an average of **21 hours** training for each employee, despite pandemic restrictions

Deployed the **ICARE Values** program, "The Endeavour Way"

COMMUNITY

Supported **142 local students** with scholarships

Donated **534 tablets** to students for online learning

ENVIRONMENT

Planted **44,000 trees** in reforestation programs

Recycled over **90% of water** used in mineral processing

Reduced absolute greenhouse gas (GHG) emissions by **34%**

ECONOMIC VALUE

99% of our workforce is local, providing **\$32.4 million** in employee wages and benefits

Spent **\$136 million** on goods and services, **96%** of total procurement is from within Mexico.

Recent Highlights

YTD Q3 Production Ahead of Plan, Improved Guidance

3.4 million oz silver and 32,816 oz Au for 6.1 million oz AgEq₍₃₎ (+39% Y-o-Y)

Robust Economics in Terronera Feasibility Study ⁽¹⁾

- \$174 million NPV (5% after tax), 20% IRR
- 3.6 years pay back period
- \$175 million initial CAPEX
- LOM 12 years; LOM AISC of \$3.24 net of by production

Early Works Underway at Terronera

- Front end engineering, procurement and site clearing have commenced
- Board approved additional \$13 million development budget until yearend
- Development decision in Q4, subject to completion of project financing

Completed Acquisition of Bruner Gold Project ⁽²⁾

- Advanced stage exploration project in favorable jurisdiction
- \$10 million cash purchase price
- Exploration plans to be provided in 2022

Improved Q2 Financial Performance Y-o-Y

- Revenue, earnings, mine operating cash flow improved significantly
- Cash at \$125 million; working capital of \$146.8 million

Operating Costs Higher than Guidance

- Q2 Cash cost ⁽²⁾ increased to \$13.03 per oz Ag; Q2 AISC ⁽⁴⁾ increased to \$25.39 per oz Ag due to global supply chain constraints creating inflationary pressures, royalty costs, higher labour costs, a strengthening Peso and increased operating development at Guanacevi

1. Economics use base case scenario at \$20/ oz silver and \$1575 / oz gold
 2. See news release dated September 1, 2021 for full details on agreement to acquire the Bruner Gold Project
 3. Silver equivalent at an 80:1 gold: silver ratio
 4. See Non-IFRS Measures disclosure in appendix

El Compas
6%

Bolanitos
31%

Guanacevi
63%

YTD Q3 2021 AgEq₍₁₎ Production 6.1 million oz

56% Ag
1,743,645
oz Ag sold

44% Au
20,473
oz Au sold

H1 2021 Revenue of \$82.2 million

2021 Production Guidance Raised

- **Consolidated Production increased** due to continued strong performance at Guanacevi due to higher grades and milled tonnes
- **Cost outlook remains unchanged** due to higher royalties and mining duties, primarily at Guanacevi
- **Terronera feasibility study** completed, additional \$13 million added to development budget until year-end
- **Parral drill program** focused on expanding resources
- **Chile drill program** has strong discovery potential

Breakdown by Mine

	Guanacevi	Bolanitos	El Compas	Consolidated
Tonnes/ Day (TPD)	1,000 – 1,200	1,000 – 1,200	200 – 250	2,400 – 2,650
Silver Production (M oz)	4.0 – 4.2	0.4 – 0.5	0.1 – 0.1	4.5 – 4.8
Gold Production (K oz)	12.0 – 13.0	24.0 – 25.0	4.1 – 4.1	40.1 – 42.1
Silver Eq Production (M oz) ⁽¹⁾	5.0 – 5.2	2.3 – 2.5	0.4 – 0.4	7.7 – 8.0
Cash Costs, net of gold by-product credits (US\$/oz) ⁽²⁾				\$7.00 – \$8.00
AISC, net of gold by-product credits (US\$/ oz) ⁽²⁾				\$19.00 – \$20.00
Sustaining Capital Budget (US\$M)				\$30.8
Development Budget (US\$M)				\$22.0
Exploration Budget (US\$M)				\$10.2

Financial Strength Growing

- **Solid Balance Sheet** fueled by mine free cash flow generation and minimal long term debt
- **Significant Mine Free Cash Flow** aided by improved operational performance and higher prices
- **Completed Sale of El Cubo in Q2** for proceeds of \$19.8 million in cash and share payments with the potential for up to \$3 million in contingent payments in the future

Guanacevi Mine, Durango

2021 Mine Plan, Metals Mix

- Historical production since 2005:
 - 38 mil oz Ag, 88k oz Au
- Improved financial performance through stronger grades & profitability
- 2021 planned mill feed:
 - El Curso, 60%
 - Santa Cruz Sur, 30%
 - Milache, 10%
- LOM + 7 years
- Reserves ⁽¹⁾: 1.1 million tonnes at 417 g/t AgEq containing 14.6 million AgEq oz
- Resources ⁽¹⁾: 660k tonnes at 435 g/t AgEq containing 9.3 AgEq oz
- Expecting mineral reserve increase in 2022 from exploration results

1. Full details in the appendix, under Reserves and Resources

Guanacevi – Production Ahead of Plan

RECORD Q3 PRODUCTION

Strong performance reflects higher throughput and grades, resulting in a 20% increase in the production outlook for 2021

IMPROVED MINE PLAN

Mining the new, higher grade El Curso orebodies has led to significantly improved grades and mine plan flexibility.

SLIDING SCALE ROYALTY ON AG PRICES

Operating costs increased due to purchased ore from local miners, increased labour costs, and royalty and special mining duty costs due to profitability

Q2, 2021 Direct Cost Per Tonne

AgEq Quarterly Production (oz) ⁽¹⁾

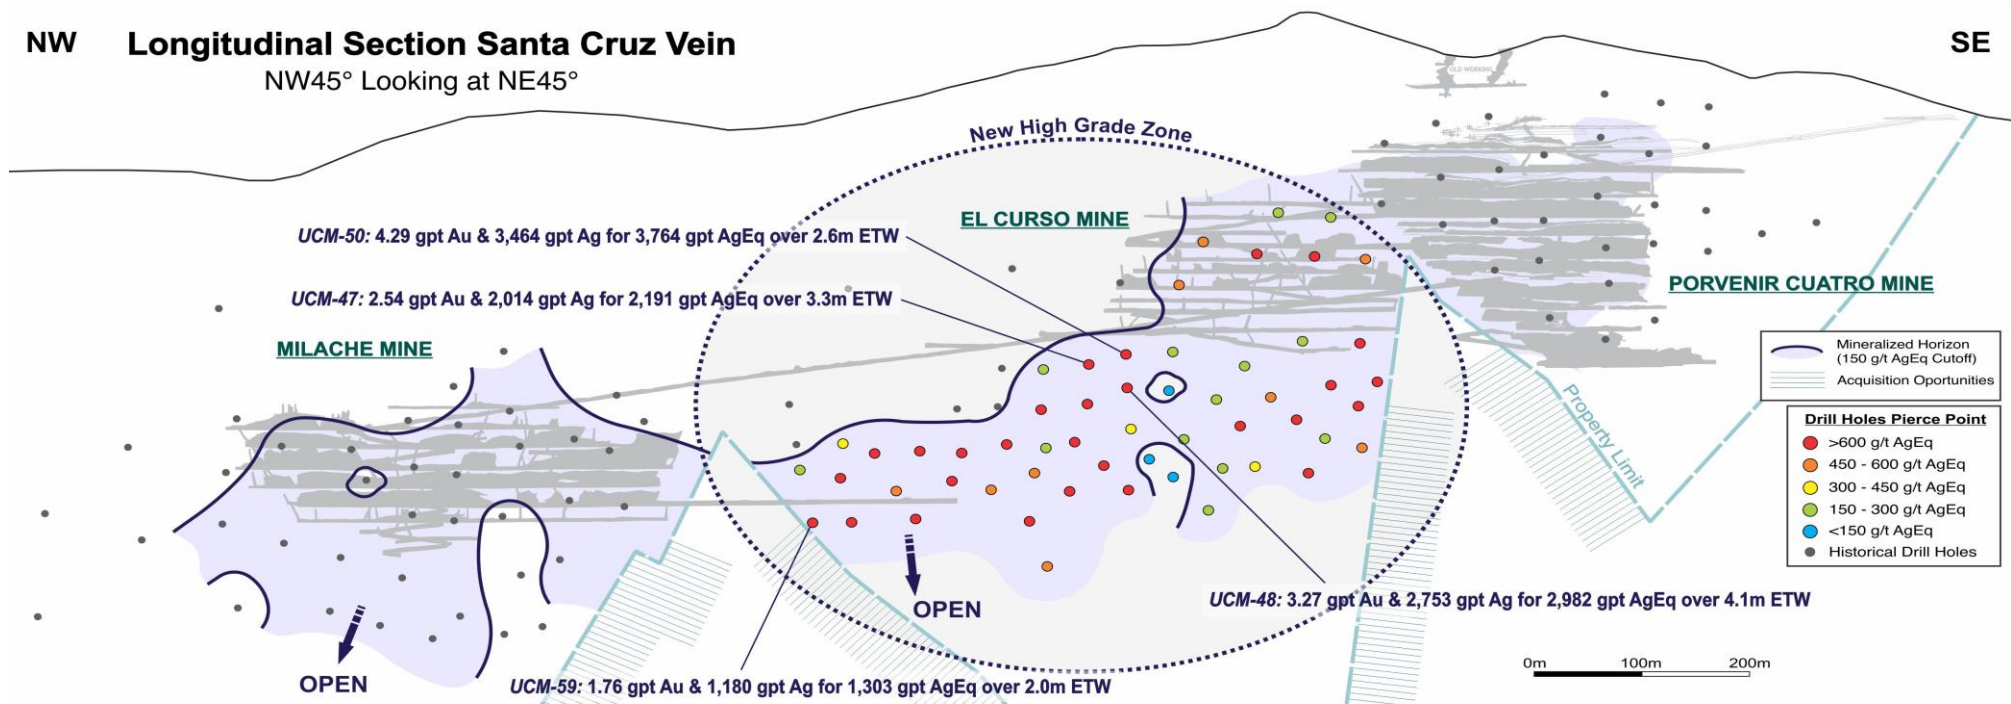

Operating Trends

	Q3, 2021	Q3, 2020	Change (%)
Tonnes Produced (tpd)	1,147	911	26%
Ag Grade (gpt)	387	336	15%
Au Grade (gpt)	1.13	0.95	19%
Cash Costs ⁽²⁾	n/a	\$9.64	n/a
All-in Sustaining Costs ⁽²⁾	n/a	\$17.76	n/a

Guanacevi - Opportunity to Expand El Curso Orebody

PROLIFIC AREA	CONTINUITY	TO THE WEST	TO THE EAST	POTENTIAL
Situated along prolific Santa Cruz vein 15 km long, producing in area since 2005	Intersecting excellent results with step holes from the margins of the El Curso orebody	Connecting Milache to El Curso – additional 100 meters to drill	Connecting El Curso to Porvenir Cuatro - additional 100 meters to drill	One continuous orebody - comparable to original Porvenir Norte orebody which supported production for +14 years

Bolanitos Mine, Guanajuato

80% Au

20% Ag

2021 Mine Plan, Metals Mix

- Historical production since 2007:
 - 16 mil oz Ag, 295k oz Au
- Improved operational and financial performance
- 2021 planned mill feed:
 - Lucero, 35%
 - San Miguel, 25%
 - La Luz, 40%
- Reserves ⁽¹⁾: 313,000 tonnes at 251 g/t AgEq containing 2.5 million AgEq oz
- Resources ⁽¹⁾: 468k tonnes at 341 g/t AgEq containing 5.1 million AgEq oz

1. Full details in the appendix, under Reserves and Resources

Bolanitos – Production on Plan

DEVELOPING NEW ORE BODIES

Focused on developing Belen vein and expanding production from Melladito vein; both new areas have multiple drill targets

Q3 PRODUCTION

Throughput ahead of plan, offset by lower ore grades due to normal variations in the ore body

Q2 COSTS

Direct production costs increased due to higher waste tonnes handled and higher labour costs; unit costs decreased due to higher gold by product credit

Q2, 2021 Direct Cost Per Tonne

AgEq Quarterly Production (oz) ⁽¹⁾

Operating Trends

	Q3, 2021	Q3, 2020	Change (%)
Tonnes Produced (tpd)	1,171	1,075	9%
Ag Grade (gpt)	41	42	(2%)
Au Grade (gpt)	1.98	2.04	(3%)
Cash Costs ⁽²⁾	n/a	(\$40.89)	n/a
All-in Sustaining Costs ⁽²⁾	n/a	\$10.51	n/a

1. Silver equivalent at an 80:1 gold: silver ratio
2. See Non-IFRS Measures disclosure in appendix

El Compas Mine, Zacatecus

80% Au

20% Ag

2021 mine plan, metals mix

- Mine & plant leased from Mexican Government
- Mine is scalable subject to purchasing or discovering additional mineral resources
- Potential to double plant capacity to 500 tpd by refurbishing additional ball mill
- Represents 5% of consolidated production
- Multiple exploration targets represent discovery opportunities
 - Satellite target: Calicanto returned drill results incl. 269 gpt Ag & 5.5 gpt over 1.1m

El Compas – Suspension of Operations

TEMPORARY CARE & MAINTANENCE

Management suspended operations in mid-August due to limited reserves

Q3 PRODUCTION

Final stockpiles processed and company personnel have been transferred to other sites or laid off

VALUE CREATION OPPORTUNITIES

Management is evaluating several opportunities

Q2, 2021 Direct Cost Per Tonne

AgEq Quarterly Production (oz) ⁽¹⁾

Operating Trends

	Q3, 2021	Q3, 2020	Change (%)
Tonnes Produced (tpd)	192	256	(4%)
Ag Grade (gpt)	24	48	(36%)
Au Grade (gpt)	1.81	3.98	(40%)
Cash Costs ⁽²⁾	n/a	\$0.44	n/a
All-in Sustaining Costs ⁽²⁾	n/a	\$40.39	n/a

1. Silver equivalent at an 80:1 gold: silver ratio
 2. See Non-IFRS Measures disclosure in appendix

Terronera Project, Jalisco

- Endeavour's next core asset
- Acquired option to purchase in 2010
- To date, invested +\$30 million on project
 - Completed 6 technical reports
 - +105,000 meters in drilling
- 2 defined ore bodies:
 - Terronera vein
 - La Luz vein
- Proposed LOM + 12 years
- Reserves ⁽¹⁾: 7.4 million tonnes at 374 g/t AgEq containing 88.8 million AgEq oz

1. Full details in the appendix, under Reserves and Resources

Terronera – A Unique Opportunity in the Silver Mining Industry

LARGE, HIGH GRADE UG MINE POTENTIAL

- Endeavour's largest mine and next core asset
- Construction ready, subject to board approval

DOUBLES CONSOLIDATED PRODUCTION

- LOM 3.3 million oz per year silver and 33,000 oz per year gold for a 12 year mine life (5.9 million Ag Eq oz¹)

1,700 TPD CAPACITY UNDERGROUND MINE

- High grade vein system
- Flotation plant producing high grade bulk sulfide concentrates

FEASIBILITY STUDY DELIVERS ROBUST ECONOMICS⁽³⁾

- After tax NPV 5% = \$174 million,
- IRR = 21.3%,
- Payback Period = 3.6 years
- \$175 million initial CAPEX

LOW-COST MINE DRIVES PROFITS

- \$0.59 per oz Cash Cost, \$3.24 per oz MAISC
- \$175 million initial capex

1. Silver equivalent at an 79:1 gold: silver ratio
2. See Non-IFRS Measures disclosure in appendix
3. Base case prices of \$20 silver and \$1,575 gold

100% ORGANIC GROWTH IN 2 YEARS

Terronera – Improvements in the Feasibility Study

Larger Reserve

- Improved methodology to capture high grade silver zones
- LOM reserves increased 33%

Higher Production & Longer Mine Life

- Production profile optimized
- Elevated grade and production in early years 1-4
- 12 year mine life

Mine Plan

- Additional portal incorporated to improve sequencing, flexibility and ore availability
- Incorporated more long hole mining to reduce OPEX

Onsite Infrastructure

- Improved cost estimates in the areas of electrical, roads, waste rock and water management

Plant Equipment

- Capacity increased to 1,700 tpd
- Upgraded crushing, grinding, flotation & filtration systems
- Increased market demand increased plant equipment prices

Increased Capital Cost

- \$175 million initial CAPEX
- Early works underway
- Construction will start once debt financing package is complete with board approval

Terronera – Robust Project Economics

Operating & Financial Metrics ⁽²⁾	2021 FS ⁽¹⁾
LOM tonnes processed (thousands)	7,380
Life of Mine (Years)	12
Average silver grade (g/t)	197
Average gold grade (g/t)	2.25
Silver equivalent grade (g/t) Base Prices	374
Avg annual Ag ounces produced (millions)	3.3
Avg annual Au ounces produced (thousands)	33
Avg annual Ag Eq ounces produced (millions)	5.9
LOM Revenue (\$, millions)	1,406
LOM EBITDA (\$, millions)	763.7
LOM Free cash flow, after tax (\$, millions)	311.4

Positive Project Economics Based on Updated 2021 FS (After-tax)

1. See Appendix for full base case assumptions in the 2021 FS. Silver and gold price assumptions were \$20/ oz Ag and \$1,575 / oz Au. The implied silver equivalent ratio is 79:1
2. See Non-IFRS Measures disclosure in appendix

Terronera – 2021 FS Base & Spot Case Highlights

3.3 million oz silver and 33,000 oz gold
LOM Annual Production

12 year mine life with 5.9 million oz of Ag Eq at 374 gpt
(79:1 ratio)

\$175 million initial capital expenditure
And \$106 million LOM sustaining capital

\$87.05 total
Direct production cost per tonne

	FS BASE CASE	FS SPOT CASE
Silver price (oz)	\$20.00	\$24.00
Gold price (oz)	\$1,574	\$1,800
Gold: silver ratio	79:1	75:1
NPV (5% after-tax)	\$174 million	\$282 million
IRR (after-tax)	21%	30%
Payback Period	3.6	2.5
LOM cash cost, net of gold by-product credit	\$0.54/ oz	(\$1.51)/oz
LOM AISC, net of gold by-product credit	\$3.24/ oz	\$1.15 /oz
Average annual after-tax free cash flow once in production	\$40 million	\$52 million
After tax cumulative undiscounted free cash flow	\$311 million	\$467 million

Terronera - Production and Grade Profile

Years 1 – 4: Average Ag Eq annual production of 7.5 million oz ; elevated grade of 456 gpt Ag Eq

• Silver equivalents are calculated at a 79:1 ratio, using base case prices of \$20/oz Ag, \$1,575/ oz Au

Terronera Vein

BLOCK : AGEQ

0.000 <=	< 150.000
150.000 <=	< 250.000
250.000 <=	< 400.000
400.000 <=	< 500.000
500.000 <=	< 12000.000

La Luz is almost entirely very high grade and will be mined early

La Luz Vein

Terronera - Exploration Opportunities

WITHIN RESOURCE FOOTPRINT

- 2 defined ore bodies: Terronera & La Luz – open to surface & at depth
- 3 main areas for resource expansion potential:
 - Deep central area
 - Central north
 - Shallow Santa Gertrudis – El Hundido area

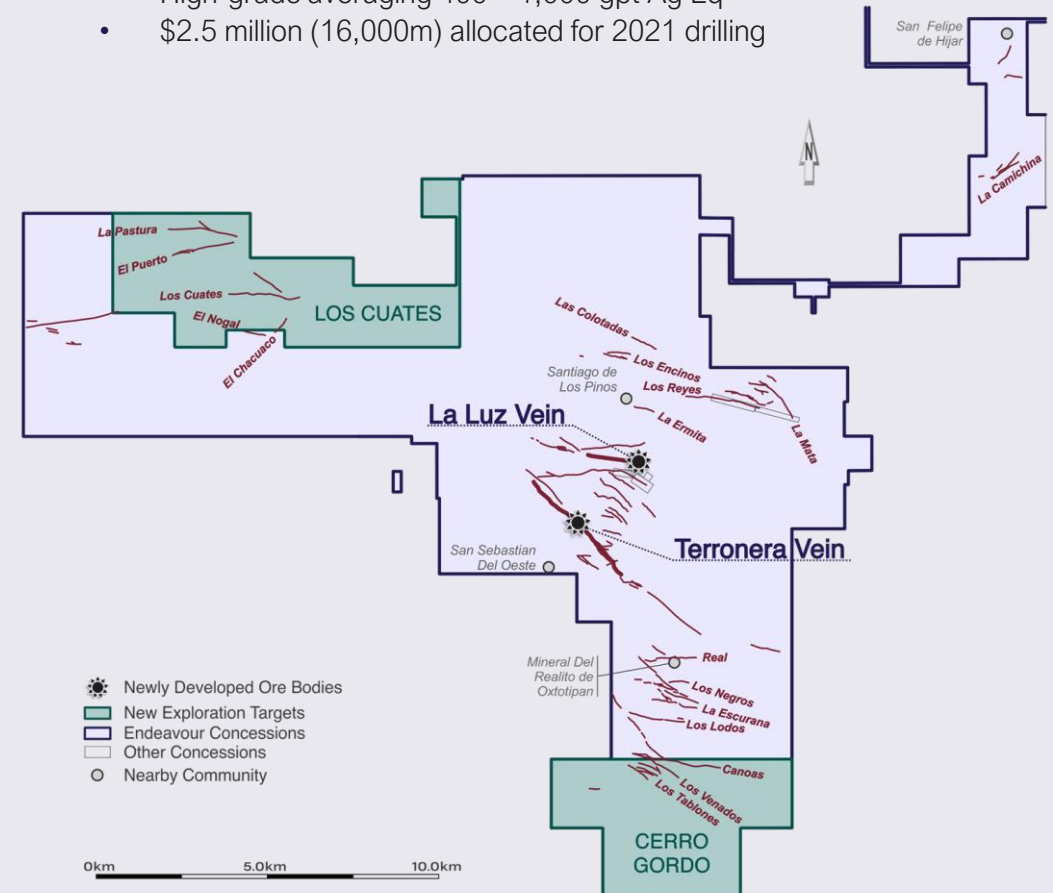

OUTSIDE RESOURCE FOOTPRINT

- Newly identified regional targets, proximal to Terronera
 - San Simon - 9.78 gpt Au and 214 gpt Ag for 899 gpt AgEq⁽¹⁾ over 1.35m ETW⁽²⁾
 - Fresno - 6.05 gpt Au and 1,056 gpt Ag for 1,479 gpt AgEq over 2.88m ETW
 - Lindero - 2.63 gpt Au and 25 gpt Ag for 209 gpt AgEq over 1.08m ETW
 - Pendencia - 1.09 gpt Au and 445 gpt Ag for 521 gpt AgEq over 1.08m ETW
 - Los Cuates - 1.36 gpt Au and 156 gpt Ag for 251 gpt AgEq over 1.21m ETW

1. Silver equivalents are converted using a 70:1 gold: silver ratio
 2. ETW: estimated true width

TERRONERA PROJECT SURFACE VIEW

- Endeavour controls 25 concessions totaling 20k hectares
- +50 mines on +50 known veins
- Thick veins widths averaging 1-30 meters thick
- High-grade averaging 400 – 1,000 gpt Ag Eq
- \$2.5 million (16,000m) allocated for 2021 drilling

Terronera - Project Timeline

PROJECT MANAGEMENT TEAM

- Significant global construction & operating experience
 - Escobal Mine, Guatemala
 - Buritica Mine, Colombia
 - Engaging with local government and state ministries to align sustainability objectives

2021 DEVELOPMENT BUDGET INCREASED

- Additional \$13 million approved upon completion of FS until year end for early works

EARLY WORKS ADVANCING

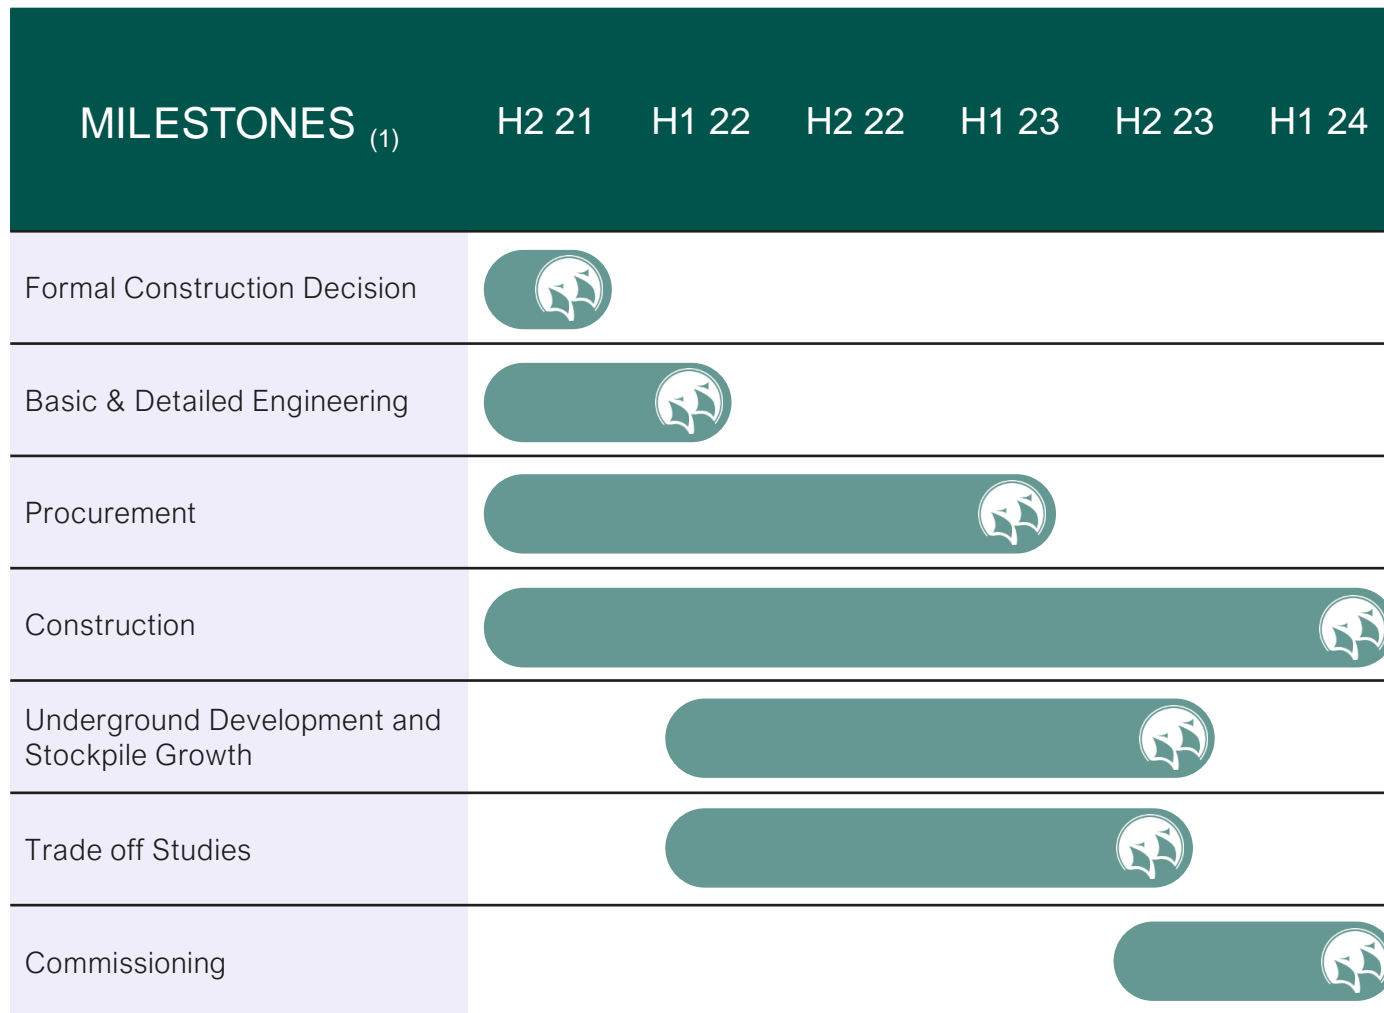

- Temporary camp construction
- Forestry prep work & site clearing
 - Within permitted areas (Portal #1 & #2)

ENGINEERING WORK UNDERWAY

- Detailed & basic is advancing with procurement activities

24 MONTH SCHEDULE

- Full construction will commence once a formal development decision has been reached by the Board, upon completion of project debt financing in Q4, 2021

1. These timeframes do not consider further disruptions to the labour market and global supply chain interruptions due to the COVID 19 pandemic

Terronera - The Right Formula for Value Creation

PROVEN STRATEGY

IMPROVED CONFIDENCE

- Comprehensive reviews & analysis in:
 - Construction & cost estimate
 - Operability

EXPERIENCED PROJECT TEAM

- Significant global construction & operating experience

ANTICIPATED BOARD APPROVAL IN Q4, 2021

- Subject to project financing completion
- Additional development budget approved for \$13 million to advance early works while financial due diligence is completed

RESPONSIBLE DEVELOPMENT

- New model mine with ESG focus
- Incorporating Equator Principles to meet financing requirements

QUALITY PROJECT

LARGE, HIGH GRADE UG MINE POTENTIAL

- Attractive both in size & grade; shallow, thick deposit style
- 12 year mine life

LOWEST QUARTILE COSTS DRIVE PROFITS

- LOM AISC₍₁₎, net of gold credit is \$3.24/ oz silver

EXPLORATION UPSIDE

- Deposit open at depth and along strike
- Other regional targets/ prospective veins

ROBUST ECONOMICS₍₁₎

- After tax NPV 5% = \$174 million,
- IRR = 21.3%,
- Payback Period = 3.6 years

Terronera - Upside Opportunities

EXPAND RESOURCES & RESERVES – exploration drilling within current resource footprint and drilling in newly identified regional targets.

MINING METHOD – additional geotechnical drilling to increase confidence in ground conditions; potential for more long hole mining and/or increased production rates and lower costs.

RECOVERY IMPROVEMENTS – evaluate alternatives for grinding and flotation circuits.

PROCESS PLANT CAPACITY – provisions to increase throughput from current reserves or as sources become available through district discoveries.

OPTIMIZE LAYOUT – to reduce earthworks volumes.

USED EQUIPMENT – to reduce cost and lead time.

FILTER TAILINGS PLANT LOCATION – to reduce haulage distance.

POWER PLANT LOCATION – to minimize LNG transport cost and public road usage.

GEOTECHNICAL – to reduce earthworks drill and blast rock and overall excavated volumes.

Terronera - Operating Cost Comparison

1. Based on the Feasibility Study for the Terronera Project, net of by product credits
2. The data presented for the operating peer group set is cash costs and AISC, net of by product credits, for the 12 months ended December 31, 2020. Source: S&P Global

Parral Project, Chihuahua

100% Ag

Resource metals mix

- Acquired Parral from SSR Mining in 2016
- Located in prolific silver mining district
 - 4 distinct mineralized vein systems
 - Veta Colorado
 - San Patricio
 - Palmilla
 - Cometa

Parral – Next Potential Core Asset

HISTORIC SILVER PRODUCING DISTRICT

- Existing development/ access to ore from past producers
- Historic annual production was 4 million Ag oz until 1990
- Indicated Resource₍₁₎ 3.7 million oz Ag
- Inferred Resource₍₁₎ 36.8 million oz Ag; 21,800 oz Au
- Objective: Define 60 million oz Ag Eq in Resources to commence PEA that models production

DISTRICT SCALE OPPORTUNITY

- Endeavour controls 4 old mines on multiple veins totaling 3,450 hectares or 35 km²
- District contains several known deposits including Santa Barbara, San Francisco, Cordero and La Cigarra

4 MINERALIZED AREAS

- Palmilla – highest silver grade mine in Mexico in 1800's, provided silver to Mexican mint
- Veta Colorada – mine produced 4 million oz Ag per year prior to closing in 1990 due to low silver price – historic IMMSA resource in place

PARRAL PROJECT SURFACE VIEW

1. Full details in the appendix, under Reserves and Resources

High Impact Discovery Potential in Chile

Why Chile?

- World class deposits - Chilean porphyry copper, epithermal gold and Bolivian epithermal silver belts all extend into northern Chile
- Exposure to bulk tonnage discoveries enhance Endeavours profile for future growth
- Opportunity to diversify commodity risk, project risk and country risk
- Business friendly jurisdiction with low political risk and an established mining industry

Chile – World Class Exploration Targets

Aida

Low Sulfidation Epithermal Silver (Pb-Zn)

- Geologically similar to 2 billion oz Cerro Potosi mine in Bolivia
- Massive epithermal alteration zone in Miocene Volcanic rocks
- Applied for drill permit, possible by year end

Paloma

High Sulfidation Epithermal Gold (Ag)

- Geologically similar to 4 million oz Solares Norte discovery
- Massive acid-sulfate alteration zone in Miocene Volcanic Caldera
- Initiated drilling in Q3, 2019 and continued drilling in 2021

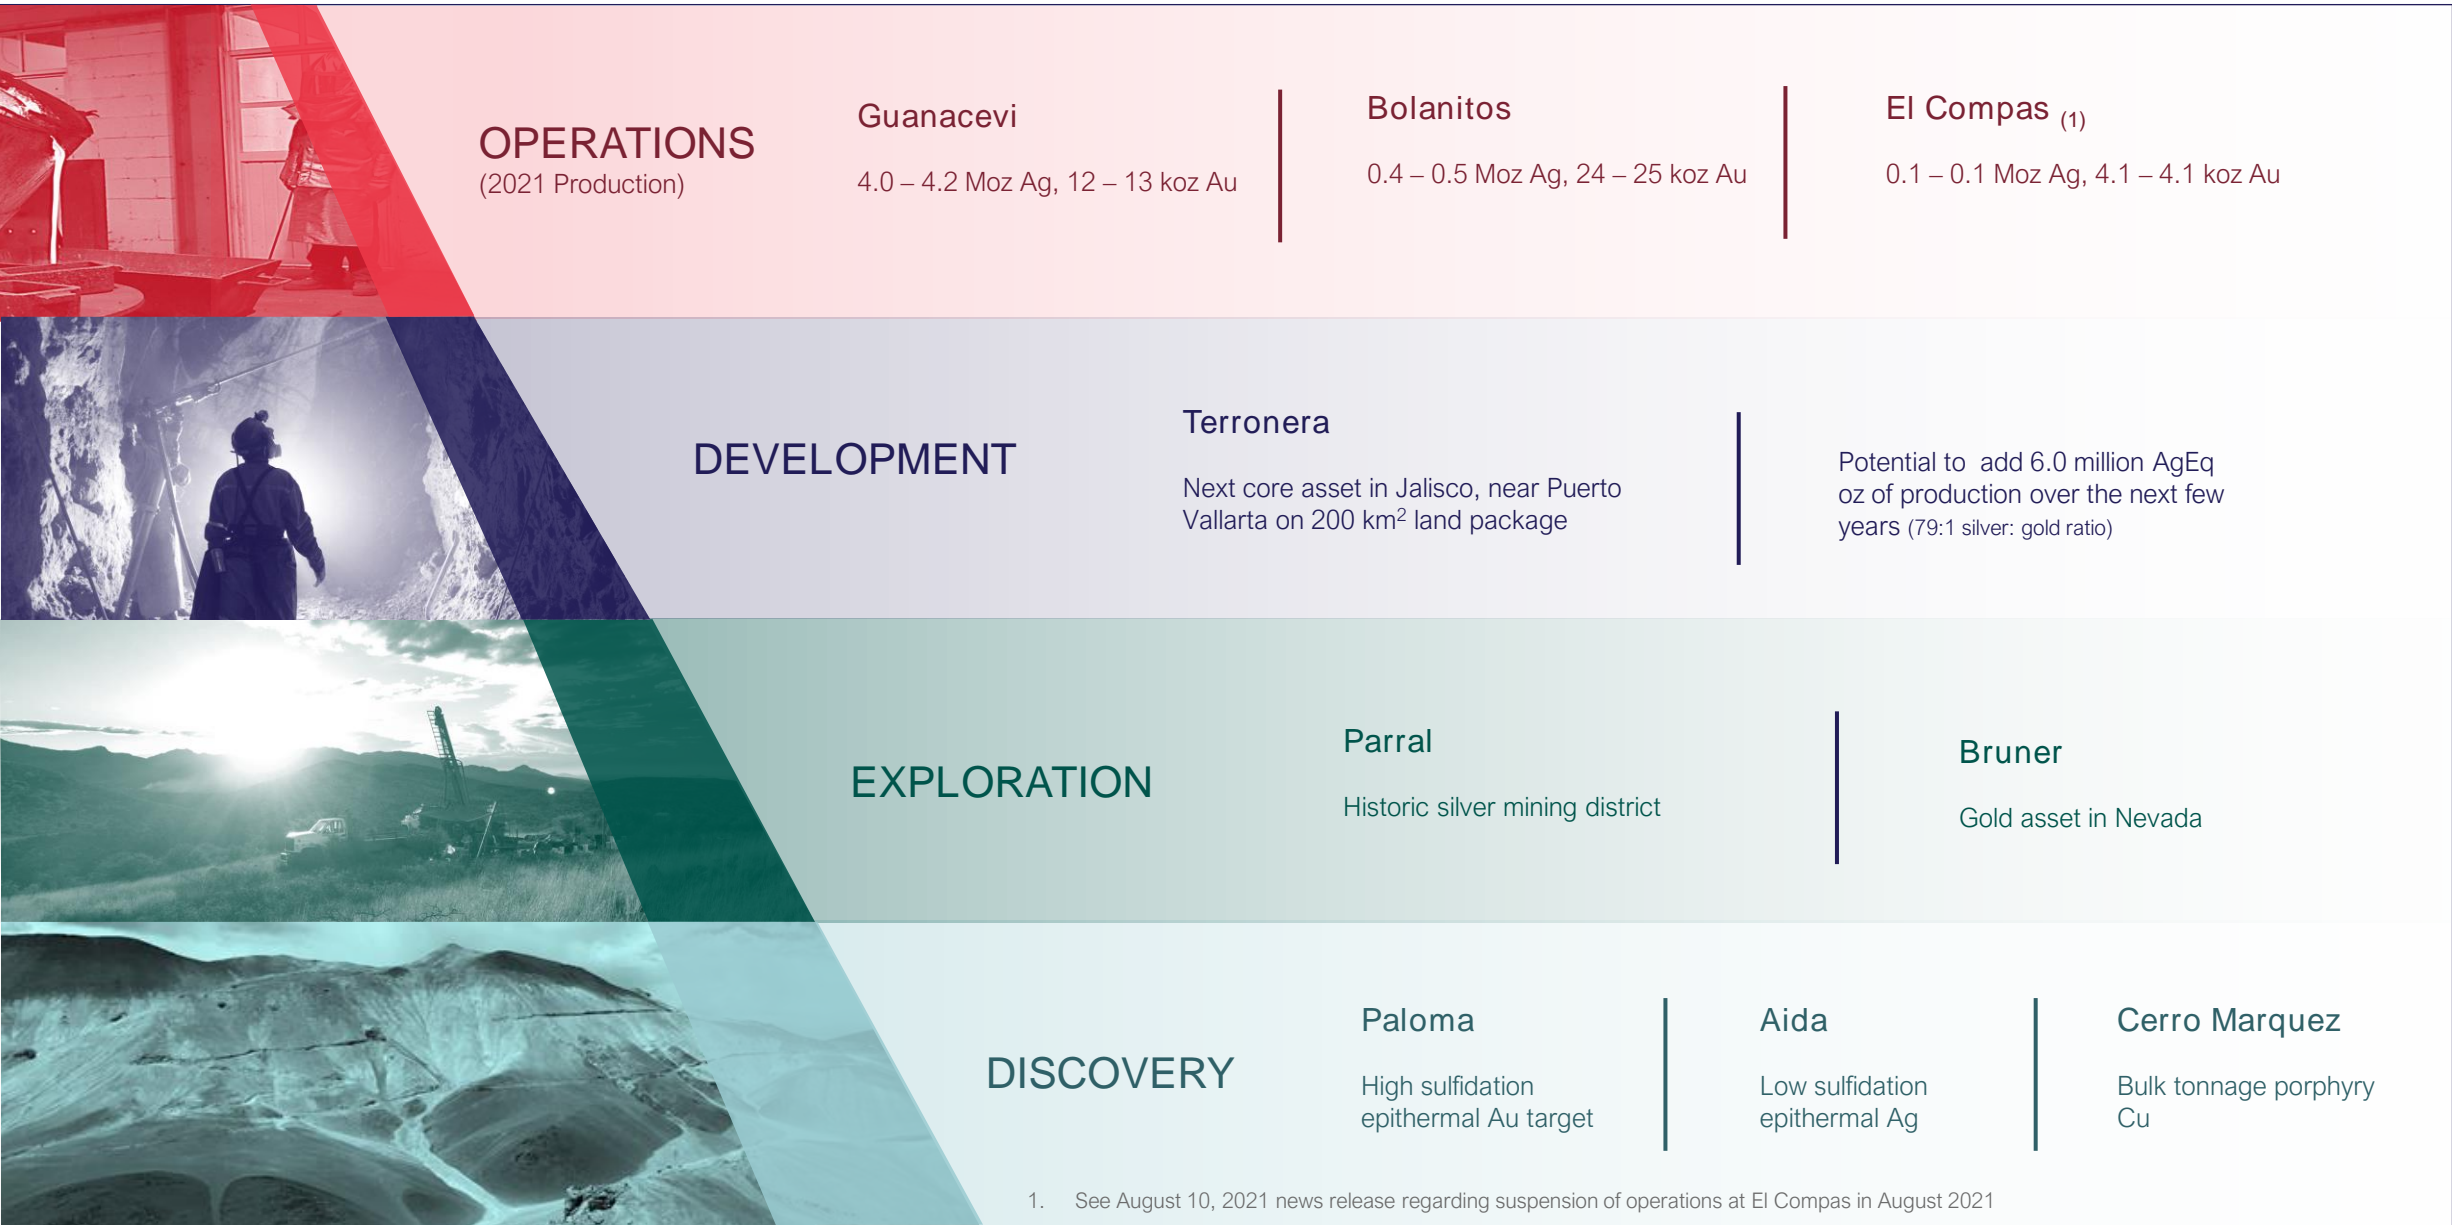

Cerro Marquez

Bulk Tonnage Porphyry Copper (Au-Mo)

- Geologically similar to other large porphyry copper mines in Chile
- Massive porphyry alteration zone in Miocene Volcanic Caldera
- Drilled in Q4, 2019 – results geologically encouraging

2021 Catalysts

Optimize Operations

Focus on delivering mine free cash flow; raising productivity, improving safety

Advance Terronera

Published FS with robust economics, commenced early works, complete project financing

Extend Mine Lives

Continue exploration drilling, replace reserves and grow resources

Make New Discoveries

Drill world class Paloma high sulfidation gold - silver prospect in Chile

Grow Through M&A

Acquire new mines that are accretive to NAV and cash flow with organic growth potential

Why Invest?

Our mission is to create value for our shareholders and become a premier silver producer in the silver mining industry.

Mid-Tier Silver
Producer

Two high-grade silver-gold mines in Mexico

Compelling
Organic Growth

Building new mines to increase production and reduce costs

Experienced
Management
Team

Proven track record with exploration, development and operational expertise

Strong Balance
Sheet

\$147 Million working capital, minimal LTD debt (as at 6/30/2021)

Pure Silver /
Gold Leverage

No base metals, no hedging & strong beta to silver price

Reserves & Resources Notes (Dec 31, 2020)

1. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability. There is no certainty that any or all part of the Mineral Resources will be converted into Mineral Reserves.
2. The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.
3. The Mineral Resources in this estimate were calculated using the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions and adopted by CIM Council.
4. Mineral Resources are exclusive of and in addition to Mineral Reserves.
5. Guanacevi Mineral Resource and Mineral Reserve cut-off grades are based on a 225 g/t silver equivalent for Santa Cruz Sur of Guanacevi and 222 g/t silver equivalent for Santa Cruz, 237 g/t silver equivalent for Milache and 280 g/t silver equivalent for Ocampo and Porvenir Norte of Guanacevi; Metallurgical recoveries were 84.6% silver and 85.7% gold for Guanacevi. The cutoff grade applied for resource calculation at the regional polymetallic projects at Guanacevi (Noche Buena and Buena Fe) is 200g/t silver equivalent. The silver equivalent is based on the calculated NSR for each element based on the following price assumptions US\$16.29/oz for silver, US\$1,195/oz for gold, US\$0.82/lb for lead and US\$0.90/lb for zinc.
6. Bolañitos, Mineral Resource and Mineral Reserve cut-off grades are based on 181 g/t silver equivalent for Lucero Ramp, Belen and Veta Madre, 173 g/t silver equivalent for La Luz Ramp and 181 g/t silver equivalent for San Miguel ramp area. Metallurgical recoveries were 84.7% silver and 88.9% gold for Bolañitos
7. El Cubo Mineral Resource and Mineral Reserve cut-off grades are based on a 202 g/t silver equivalent for Area II (that comprises Dolores Mine) of El Cubo and 223 g/t silver equivalent for Areas I&IV (that comprise Santa Cecilia and San Nicolas Mines) of El Cubo. Metallurgical recoveries were 87.0% silver and 86.7% gold for El Cubo.
8. El Compas Mineral Resource and Mineral Reserve cut-off grades are based on a 3.67 g/t gold equivalent. Metallurgical recoveries were 67.0% silver and 82.0% gold for El Compas
9. Mineral Resource cut-off grades for Terronera was 150 g/t silver equivalent and the Mineral Reserve cut-off grades for Terronera and La Luz Deposits were 160 g/t and 216 g/t silver equivalent respectively.
10. Mineral Resource and Mineral Reserve cut-off grades are based on a 100 g/t silver equivalent for Guadalupe y Calvo.
11. Parral Mineral Resources are estimated at a cut-off grade of 130 g/t AgEq for Palmilla, Veta Colorada, and San Patricio, 200 g/t Ag for Sierra Plata, and an NSR cut-off value of US\$55/t for El Cometa. The NSR and AgEq values are based on estimated metallurgical recoveries, assumed metal prices and smelter terms, which include payable factors, treatment charges, penalties, and refining charges. Metal price assumptions were: US\$17/oz Ag, US\$1,275/oz Au, US\$1.15/lb Zn, and US\$1.00/lb Pb. A minimum mining width of 1.5 m was used for Sierra Plata, and 1.75 m for all other veins.
12. Calicanto Mineral Resources are estimated at a cut-off value of US\$200 VIT (value in-situ) for Calicanto, Santa Fe and Misie veins areas. The VIT values are based on metal price assumptions of US\$23.98/oz Ag, US\$1,815/oz Au, US\$3.5/lb Cu, US\$0.94/lb Pb, and US\$1.25/lb Zn. A minimum mining width of 1.0 m was used.
13. Mining recoveries of 93% were applied for Guanacevi, Bolañitos and El Compas, 88% for El Cubo and 95% for Terronera for Mineral Reserve Estimate calculations. Minimum mining widths were 0.8 metres for Mineral Reserve Estimate calculations.
14. Dilution factors for Mineral Reserve Estimate calculations averaged 34.7% for Guanacevi, 34% for Bolañitos and 35.7% for El Compas, and 10% for Terronera. For current operations dilution factors are based on vein width diluted to width of drive for lateral sill preparation (generally >30%) and internal stope dilution calculations and external dilution factors of 15% for cut and fill mining and 30% for long hole mining.
15. Silver equivalent grades and ounces are based on a 80:1 silver:gold ratio and calculated including only silver and gold.
16. Probable Mineral Reserves for Terronera includes the Terronera and La Luz Deposits.
17. Inferred Mineral Resources for Terronera includes the Terronera, La Luz and Real Alto Area.
18. Indicated and Inferred Silver-Gold Mineral Resources for "Parral" includes the Colorada, Palmilla and San Patricio areas.
19. The Veta Colorada structure (Parral) does not contain gold on an economic scale.
20. Price assumptions for Guanacevi, Bolañitos, El Cubo and El Compas are US\$16.51/oz for silver, US\$1,465/oz for gold.
21. Price assumptions for Terronera are US\$17/oz for silver, US\$1,275/oz for gold.
22. Price assumptions for Parral are US\$15/oz for silver, US\$1,275/oz for gold.
23. Figures in tables are rounded to reflect estimate precision; small differences generated by rounding are not material to the estimates.

Dale Mah, P.Geo., Vice President Corporate Development of Endeavour, is the Qualified Person who reviewed and approved this presentation and the technical information contained in these Mineral Reserve and Resource Estimates. A Quality Control sampling program of reference standards, blanks and duplicates has been instituted to monitor the integrity of all assay results. All samples are split at the local field office and shipped to ALS-Chemex Labs, where they are dried, crushed, split and 50 gram pulp samples are prepared for analysis. Gold and silver are determined by fire assay with an atomic absorption (AA) finish.

The Mineral Reserve Estimate for Terronera in the technical report titled "*Endeavour Silver Corp, Terronera Project, Jalisco State, Mexico*" effective July 31, 2020 were undertaken by Independent Qualified Persons from Ausenco Engineering Canada Inc - Robin Kalanchey, P.Eng., P&E Mining Consulting - Eugene Puritch, P.Eng. FEC. CET, David Burga P.Geo., Yungang Wu, P.Geo., D. Gregory Robinson P. Eng., Wood Engineering - Humberto Preciado, P.E., Eugenio Iasillo P.E., JDS Mining - Mike Levy P.E., P.Eng., Moose Mountain – Mike Petrina P.Eng..

The Parral Mineral Resources disclosed in this press release have been estimated by Mr. Jose Texidor Carlsson, P.Geo., an employee of Roscoe Postle Associates (RPA) and independent of Endeavour. By virtue of his education and relevant experience, Mr. Texidor Carlsson is a "Qualified Person" for the purpose of National Instrument 43-101. The Mineral Resources have been classified in accordance with CIM Definition Standards for Mineral Resources and Mineral Reserves (May 2014). Mr. Texidor Carlsson, P.Geo. has read and approved the contents of this press release as it pertains to the disclosed Parral Mineral Resource estimates.

Terronera Feasibility Study Summary

PROJECT SUMMARY	FS	PFS	%
	2021	2020	Change
Tonnes Mined (Thousands)	7,380	5,563	33%
Mined Gold (koz)	533.6	410.0	30%

Non-IFRS Measures

Endeavour Silver reports non-IFRS measures which include cash costs net of by-product revenue on a payable silver basis, total production costs per ounce, all-in sustaining costs per ounce, direct production costs per tonne, silver co-product cash costs and gold co-product cash costs in order to manage and evaluate operating performance at each of the Company's mines. These measures, some established by the Silver Institute (Production Cost Standards, June 2011), are widely used in the silver mining industry as a benchmark for performance, but do not have a standardized meaning and are reported on a production basis.

Full reconciliation and definitions of each of these measures are provided in the Company's quarterly Management Discussion and Analysis (MD&A) as filed on SEDAR and posted on the company website.

Cash cost ("Cash cost") per ounce - Cash cost per ounce is a non-IFRS measure. In the silver mining industry, this metric is a common performance measure that does not have a standardized meaning under IFRS. Cash costs include direct costs (including smelting, refining, transportation and selling costs), royalties and special mining duty and changes in finished goods inventory net of gold credits. For the purpose of the FS, special mining duty has not been included in cash costs but is included in tax expense.

Mine Site - All-in sustaining costs ("MAISC") and All-in sustaining cost ("AISC") per ounce - MAISC and AISC per ounce are non-IFRS measures. These measures are intended to assist readers in evaluating the total cost of producing silver from operations. While there is no standardized meaning across the industry for AISC measures, the Company's definition conforms to the definition of AISC as set out by the World Gold Council and used as a standard of the Silver Institute. The Company defines AISC as the cash operating costs (as defined above), reclamation cost accretion, mine site expensed exploration, corporate general and administration costs and sustaining capital expenditures. For the purpose of the FS, MAISC does not include corporate general and administration costs.

Free cash flow - In the mining industry, free cash flow is a common performance measure with no standardized meaning. The Company calculates free cash flow by deducting cash capital spending (capital expenditures, net of expenditures paid through finance leases) from net cash provided by operating activities. The Company discloses free cash flow as it believes the measure provides valuable assistance to investors and analysts in evaluating the Company's ability to generate cash flow after capital investments and build the cash resources of the Company.

Initial and sustaining capital - Initial and sustaining capital are non-IFRS measures. Initial capital is defined as capital required to develop and construct to bring the mine to commercial production and sustaining capital is defined as the capital required to maintain operations at existing levels. Both measurements are used by management to assess the effectiveness of an investment program.

Earnings before Interest, Taxes, Depreciation, and Amortization ("EBITDA") - EBITDA represents net earnings before interest, taxes, depreciation and amortization. EBITDA is an indicator of the Company's ability to generate liquidity by producing operating cash flow to fund working capital needs, service debt obligations, and fund capital expenditures.

Gross revenue and Gross Cost of Sales - Gross revenue represents gross sales of silver and gold and is calculated by adjusting net revenue for the removal of treatment, refining and transportation costs. Gross cost of sales is calculated by adjusting cost of sales for the inclusion of treatment, refining and transportation costs.

Other examples of Non-IFRS Measures for which definitions and reconciliations are provided for in the Company's quarterly Management Discussion and Analysis (MD&A) include operating cash flow before working capital changes, adjusted net earnings, and working capital

Feasibility Study Reserves and Resources

Terronera and La Luz Probable Mineral Reserve (FS 2021)							
Terronera	Tonnes (kt)	Ag (g/t)	Au g/t	Ag Eq g/t	Ag (000's oz)	Au (000's oz)	Ag Eq (000's oz)
Total Probable	7,380	197	2.25	374	46,707	534	88,834

Notes

1. Mineral Resource cut-off grades for Terronera was 150 g/t silver equivalent and the Mineral Reserve cut-off grades for Terronera and La Luz Deposits were 166 g/t and 197 g/t silver equivalent respectively.
2. Mining recoveries of 93% were applied for Terronera for Mineral Reserve Estimate calculations. Minimum mining widths were 1.0 metres for Mineral Reserve Estimate calculations.
3. Dilution factors for Mineral Reserve Estimate calculations averaged 27.5%.
4. Silver equivalent grades and ounces are based on a 79:1 silver:gold ratio
5. See Cautionary Note to U.S. Investors below.

2021 Terronera Resource Estimate							
	Tonnes (kt)	Ag (g/t)	Ag (koz)	Au (g/t)	Au (koz)	AgEq (g/t)	AgEq (koz)
Indicated	5,181	256	42,707	2.49	415	443	73,755
Inferred	997	216	6,919	1.96	63	363	11,624

2021 La Luz Resource Estimate							
	Tonnes (kt)	Ag (g/t)	Ag (koz)	Au (g/t)	Au (koz)	AgEq (g/t)	AgEq (koz)
Indicated	122	182	745	13.11	54	1,165	4,774
Inferred	61	150	295	11.35	22	1,001	1,977

Notes

1. Mineral Resources have an effective date of March 5, 2021. The Qualified Person responsible for the Mineral Resource estimate is Tatiana Alva, P. Geo, an employee of Wood Canada Ltd.
2. Mineral Resources includes Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. AgEq is calculated as the sum of silver plus gold grades factored by the differential in gold and silver metal prices and metallurgical recoveries.
4. Mineral Resources are constrained within a wireframe constructed at a nominal 150 g/t AgEq cut-off grade
5. A 150 g/t AgEq cut-off grade considers metallurgical performance, mining, processing, site G&A operating costs, treatment and refining charges and royalties.
6. Mineral Resources are stated as insitu with no consideration for planned or unplanned external mining dilution.
7. The silver and gold estimates presented in the Mineral Resource estimate table have not been adjusted for metallurgical recoveries.
8. Numbers have been rounded as required by reporting guidelines, and may result in apparent summation differences.
9. See Cautionary Note to U.S. Investors below.
