Disclaimer

Cautionary Note Regarding Forward-Looking Statements

The information contained herein includes "forward-looking information" and "forward-looking statements" within the meaning of applicable Canadian and U.S. securities laws (collectively, "forward-looking statements") concerning the business, operations and financial performance of Gold Royalty Corp. ("GRC" or the "Company") and, in some instances, the business, mining operations and performance of GRC's counterparties and proposed counterparties. Forward-looking statements including but not limited to statements regarding the Company's 2024 outlook, including estimated Total Revenue, Land Agreement Proceeds and Interest and GEOs for 2024 and other statements regarding expected future financial performance; the expectations of the operators of the projects underlying the Company's royalty interests and the Company's Vares Stream, including their announced expected production timelines, milestones and schedules, expected future cash flows from the Company's royalties, the Vares Stream and other interests; and expectations regarding the Company's growth and statements regarding the Company's plans and strategies. Such statements can be generally identified by the use of terms such as "may", "will", "expect", "intend", "believe", "plans", "anticipate" or similar terms. Forward-looking statements are based on the then current expectations, beliefs, assumptions, estimates and forecasts about GRC's business and the industry and markets in which it operates. Forward-looking statements are made based upon numerous assumptions and although the assumptions made by the Company in providing forward-looking statements are considered reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate. Forward-looking statements also involve known and unknown risks and uncertainties and other factors, which may cause actual results, performances and achievements of GRC to differ materially from any projections of results, performances and achievements, including, without limitation, any inability of the operators of the properties underlying the Company's royalty interests to execute proposed plans for such properties or to achieve planned development and production estimates and goals, risks related to the operators of the projects in which the Company holds interests, including the successful continuation of operations at such projects by those operators, risks related to exploration, development, permitting, infrastructure, operating or technical difficulties on any such projects, the influence of macroeconomic developments, commodities price volatility and other factors set forth in the Company's publicly filed documents with the Securities Exchange Commission (the "SEC"), including the Company's Annual Report on Form 20-F for the year ended December 31, 2024 available at www.sec.gov and www.sedarplus.ca.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended and even if events or results described in the forward-looking statements are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, GRC. Accordingly, readers should not place undue reliance on forward-looking statements and are cautioned that actual outcomes may vary. Any forward looking statement speaks only as of the date on which it is made, reflects management's current beliefs based on current information and the Company undertakes no obligation to update or reissue forward-looking statements as a result of new information or events except as required by applicable securities laws.

Technical Information

Alastair Still, P.Geo., the Director of Technical Services of the Company, is a qualified person as such term is defined under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") and subpart 1300 of Regulation S-K ("SK1300") and has reviewed and approved the scientific and technical information contained herein.

Disclosure relating to properties in which GRC holds royalty or other interests is based on information publicly disclosed by the owners or operators of such properties. The Company generally has limited or no access to the properties underlying its interests and is largely dependent on the disclosure of the operators of its interests and other publicly available information. The Company

generally has limited or no ability to verify such information. Although the Company does not have any knowledge that such information may not be accurate, there can be no assurance that such third-party information is complete or accurate. In addition, certain information publicly reported by operators may relate to a larger property than the area covered by the Company's interests, which often may only apply to a portion of the overall project area or applicable mineral resources or reserves. It cannot be assumed that all or any part of a measured, indicated or inferred resource will ever be upgraded to a higher category. "Inferred mineral resources" have a greater amount of uncertainty as to their existence and their economic and legal feasibility. Therefore, readers are cautioned not to assume that all or any part of the "inferred mineral resources" exist.

Except where otherwise stated, the disclosure in this press release relating to the Vares Project has been derived from the disclosures of Adriatic Metals plc ("Adriatic") identified herein and other public information disclosed by it. Such information has not been independently verified by the Company. Specifically, Gold Royalty has limited, if any, access to the property subject to the royalty. Although Gold Royalty does not have any knowledge that such information may not be accurate, there can be no assurance that such third-party information is complete or accurate.

Unless otherwise indicated, the technical and scientific disclosure contained or referenced in this news release, including any references to mineral resources or mineral reserves, was prepared by the Adriatic under the 2012 Edition of the Australasian Code for Reporting of Exploration Results ("JORC"), which differs from the requirements under NI 43-101 and those of the U.S. Securities and Exchange Commission, including under subpart 1300 of Regulation S-K under the Securities Exchange Act of 1934 ("SK 1300"). Accordingly, the scientific and technical information contained or referenced in this news release may not be comparable to similar information prepared by entities under NI 43-101 or SK 1300.

In addition, the disclosure herein includes information regarding resource and reserve estimates and other exploration information prepared and disclosed by Adriatic, which has been included by the Company pursuant to Item 1304 of SK1300 as such information was prepared and disclosed by Adriatic prior to the Company's acquisition of an interest in Vares. The Company is not treating such information as a current estimate of mineral resources or mineral reserves under SK1300 and notes that a qualified person of the Company has not done sufficient work to classify the estimate as such under SK1300.

Non-IFRS Measures

We have included, in this presentation, certain performance measures that do not have standardized meanings prescribed under International Financial Reporting Standards ("IFRS"), including: (i) Total Revenue, Land Agreement Proceeds and Interest, which is determined by adding land agreement proceeds credited against mineral properties and interest received on the Company's gold-linked loan; and (ii) GEOs, which are determined by dividing revenue by the average gold price for the applicable period. Each of these are non-IFRS measures.

The presentation of such non-IFRS measures is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Company presents such measures as it believes that certain investors use this information to evaluate the Company's performance in comparison to other royalty companies in the precious metals mining industry. Readers are advised that other companies may calculate such measures differently. The presentation of these non-IFRS measures is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. For additional information, including a numerical reconciliation of such non-IFRS measures, readers should refer to the section titled "Non-IFRS Measures" in Item 5 of the Company's Annual Report on Form 20-F for the year ended December 31, 2023, which is incorporated by reference herein and available under the Company's profile at www.sedar.com.

Why Invest in Gold Royalty?

/// Free Cash Flow Inflection

- Growth through acquisitions have provided significant near-term revenue and cash flow
- Development of projects within Gold Royalty portfolio provide near-term growth at no additional cost
- Strengthening revenues and positive FCF provide increased near-term leverage to strong gold commodity prices

/// Attractive Valuation

- Gold Royalty share price is appealing versus many precious metals and royalty peers
- Acquisitions add scale and cash flow which could drive re-rating of valuation multiples
- Low-cost exposure to catalyst-rich world-class assets and operators

/// Quality Portfolio of Tier 1 Royalties

- Cornerstone royalties on Tier 1, long life assets operated by premier mining companies in the industry in low-risk jurisdictions
- Embedded zero-cost growth through meaningful exploration investment across the portfolio by asset operators
- Four pillars of growth allow the portfolio to continue expanding through the acquisition of high-quality assets

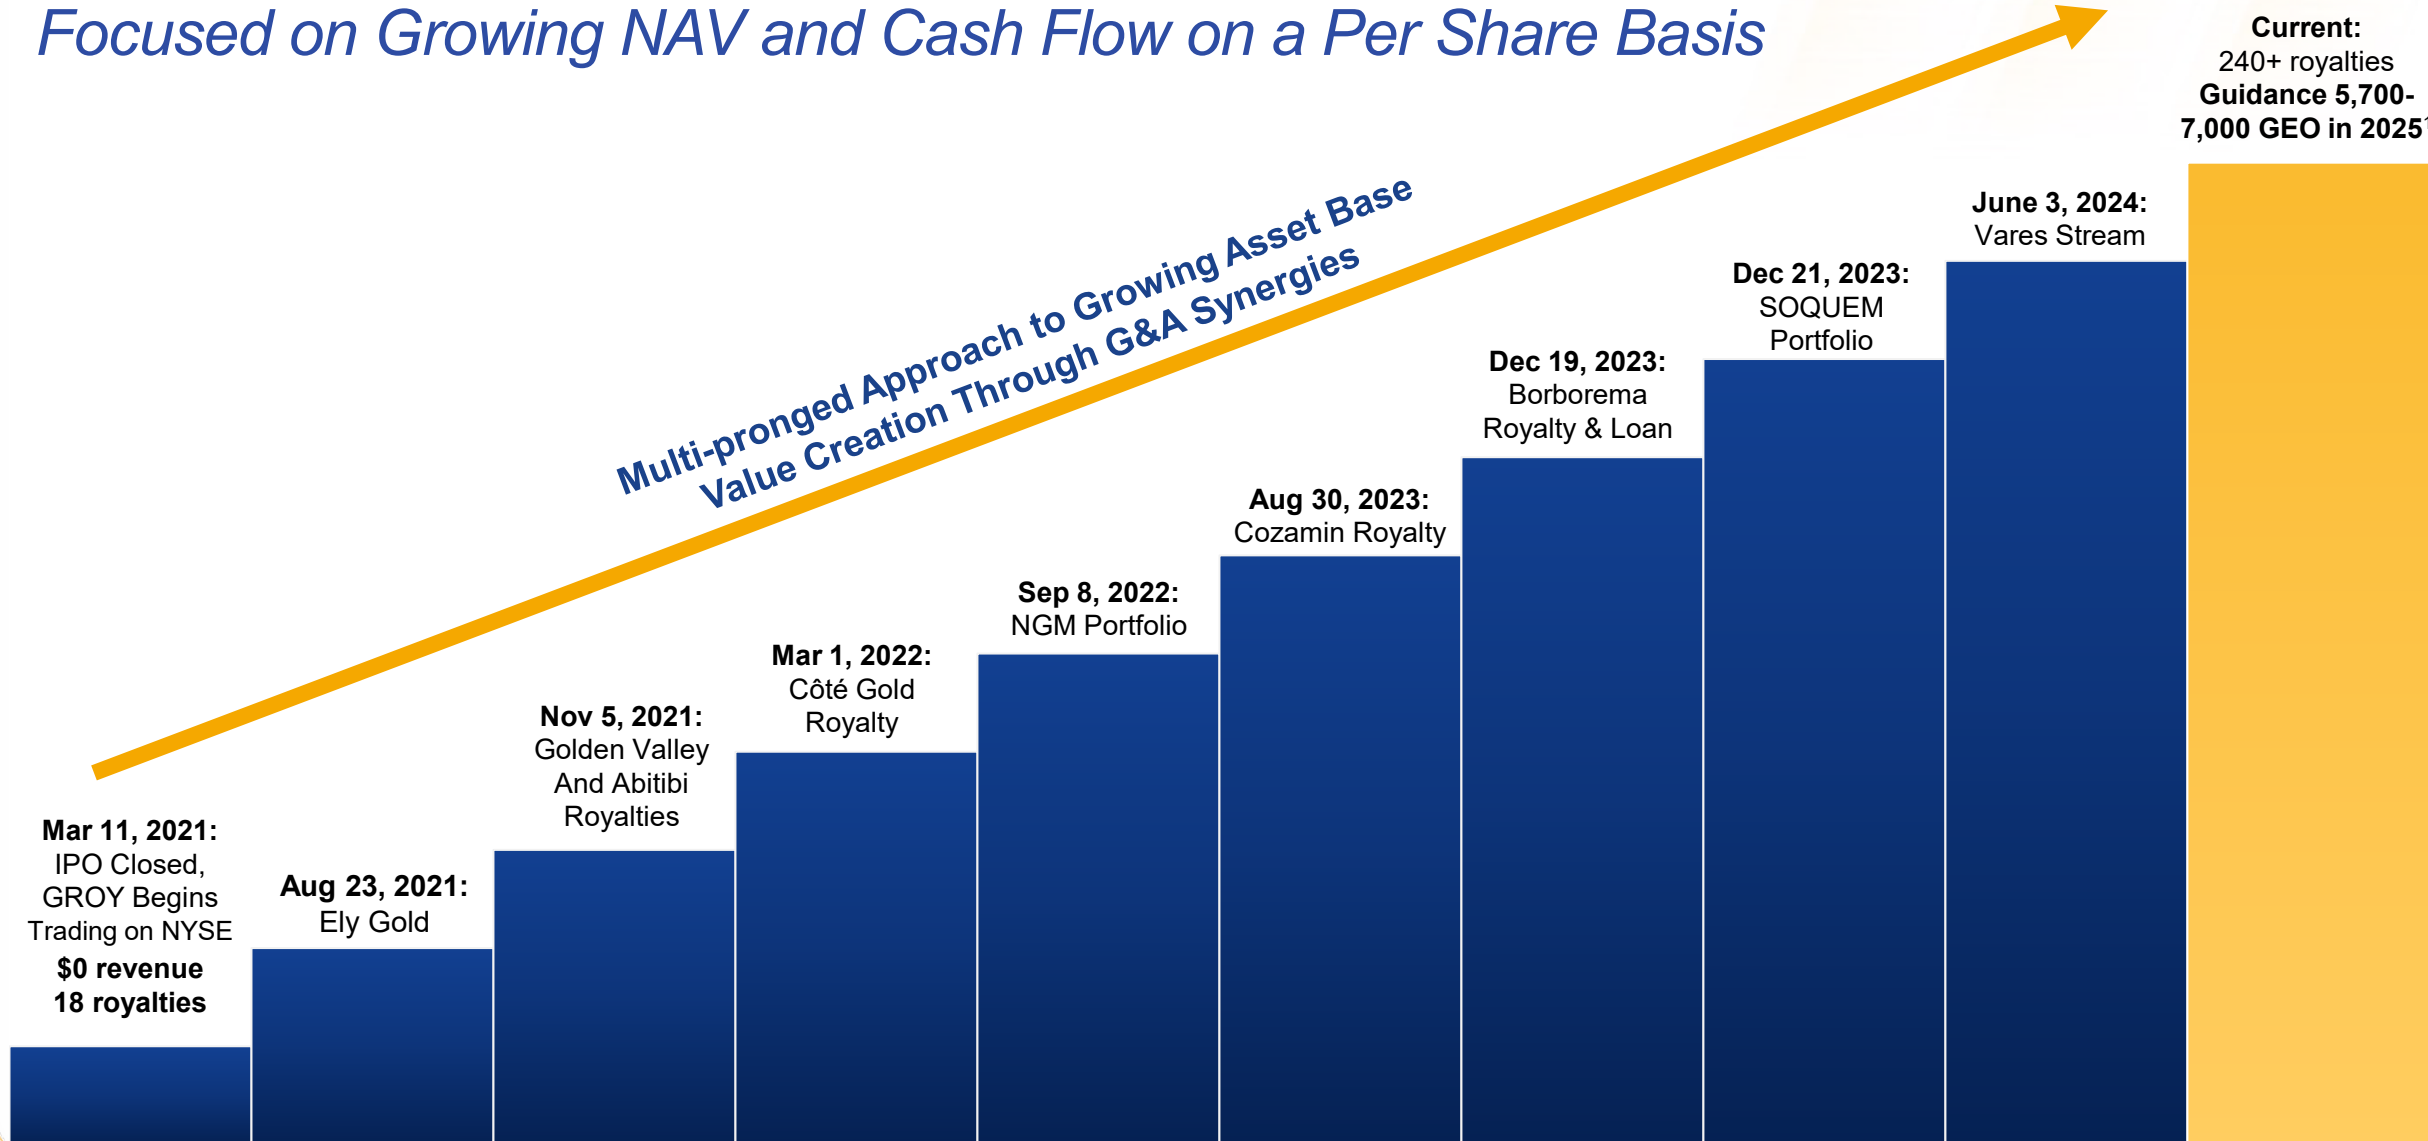

/// Experienced Management Team & Board

- Over 400 years of collective experience with wide breadth of expertise and strong connectivity throughout the industry
- Strategic investors Queen's Road Capital and Taurus add to management's access to opportunities
- Royalty model is scalable with existing team

Gold Royalty's Track Record

Focused on Growing NAV and Cash Flow on a Per Share Basis

Competitive Advantage:

Four Unique Pillars of Growth

Flexible Growth Options Allow Gold Royalty to Pivot Growth Strategy to Suit the Environment – Today This Means Prioritizing Cash Flowing Assets (While Continuing to Generate Early-Stage Royalties Internally at Low Cost)

Royalty Financing

- Providing royalty or stream financing to fund project development.
- Consideration is typically cash.
- Contingent or deferred payments can de-risk investments.

Third Party Acquisitions

- Acquiring royalties from third parties such as mining companies or prospectors.
- Consideration can be a mix of cash or stock.

Corporate M&A

- Corporate mergers and acquisitions can benefit both sets of shareholders through increased scale, lower costs of capital, and G&A synergies.
- Consideration can be a mix of cash or stock.

Royalty Generation

- Gold Royalty prospecting team generates royalties by vending assets to operators.
- Focus on Nevada and Quebec.
- Gold Royalty typically receives payments to generate these royalties rather than paying for them.

Portfolio Composition

* Long-term outlook guidance year as indicated by each company

Cash Flow Inflection

Scenario Analysis Shows Strong Revenues at a Range of Potential Gold Prices

Analysts are anticipating strong production growth which translates to meaningful inflection at current gold price

Key Upcoming Catalysts

**Near-term
(<1 year)**

- **Borborema** – Initial production in Q1 2025; potential highway relocation approval driving mineral reserve growth
- **Côte Gold** – Full nameplate capacity of 36,000 tpd by Q4 2025
- **Fenelon** – Expected updated PEA Q1 2025
- **Granite Creek** – Increased production rate and updated mineral resource estimate expected in Q4 2025
- **Vareš** – Full nameplate capacity of 0.8Mtpa expected in H2 2025

**Medium-term
(<2 years)**

- **Borden** – Exploration potential under new ownership with Discovery Silver
- **County Line** – Initial production pending expected permits
- **Odyssey** – Odyssey South & Internal Zones ramp up, potential additional production during 2026-2028
- **Tonopah West** – Updated PEA by Q2 2026
- **REN** – Expected to achieve production rate of 140,000 ounces gold per year in 2027
- **South Railroad** - Record of Decision (final permitting decision) by mid-2026, construction to start thereafter
- **Vareš** – Growth from 0.8Mtpa to 1.0Mtpa expected in 2026, expansion to 1.3Mtpa expected in 2027

**Long-term
(>2 years)**

- **Odyssey** – Initial production of East Malartic & Odyssey North; filling excess mill capacity with potential near-surface targets, potential for second shaft to expand and accelerate production; Agnico Eagle internal study to be released in 2026
- **South Railroad** – Initial production expected in 2027
- **Tonopah West** – Construction on an exploration decline to start 2027

Key Growth Assets

Production Ramp Up Expected at Vareš, Côte, and Borborema in 2025

Vareš¹ – 100% Copper Stream

Operator: Adriatic Metals

Location: Bosnia and Herzegovina

- Ramp up expected to be completed during H2 2025 to achieve 800ktpa, potential to achieve 1.0Mtpa with minimal additional cost
- Fully funded growth from 0.8Mtpa to 1.0Mtpa expected in 2026; expansion to 1.3Mtpa expected in 2027; total throughput increase of 63%
- 145,755t ore mined in 2024 (63,100t mined in Q3 2024; 73,215 in Q4 2024)
- Guidance for the Vareš mine of 625,000 – 675,000t ore milled in 2025

Côte Gold² – 0.75% NSR

Operator: IAMGOLD

Location: Ontario, Canada

- Ramp up remains on track to achieving steady-state nameplate throughput rate of 36,000tpd in Q4 2025
- Production from Côte Gold is expected to approximately double in 2025 to 360,000-400,000oz gold (100% basis)
- Produced 96,000oz gold in Q4 2024 (100% basis), including monthly production of 37,000oz gold in both November and December
- Installation of Vertimill could expand mill capacity to 42,000tpd (from 36,000tpd)

Borborema³ – 2.0% NSR

Operator: Aura Minerals

Location: Rio Grande do Norte, Brazil

- First gold pour expected in Q1 2025 with commercial production following in H2 2025
- Construction capex for the project has been 100% committed with already 5.7Mt of pre-stripping being complete
- Expected reach between 40% and 48% of designed nominal capacity in 2025 – equivalent to an annualized rate of 83,000oz Au
- Guidance for the Borborema mine of 33,000 – 40,000oz gold in 2025

Portfolio Update

2024 Fourth Quarter - Selected Asset Developments

Odyssey¹

- Development activities at Odyssey remain on-schedule with ongoing ramp development and shaft sinking
- Study over potential sinking of a second shaft at Odyssey is expected to be released in 2026

Cozamin²

- Capstone copper released 2025 guidance for Cozamin - 23,000 to 26,000 tonnes of copper production at expected grades of approximately 1.87%

Ren³

- Expected to achieve an annual production rate of 140,000 ounces of gold by 2027

Granite Creek⁴

- I-80 Gold released a PEA for open pit and underground operations at Granite Creek
- Underground operations remain ramping-up to full production of 1,000tpd while the open-pit is expected to produce in 2029 as a conventional CIL process

Tonopah West⁵

- Blackrock Silver received required approvals to build an exploration decline in 2027 at Tonopah West
- Expanded drilling program for 2025 to 15,000m and Blackrock Silver is expected to release an updated mineral resource estimate by Q3 2025

Borden⁶

- Discovery Silver released a PEA over the Porcupine complex detailing a 9-year LOM for Borden, processing 5.4Mt at 5.36g/t for 867koz Au recovered
- Exploration targets and future production trail at depth, in areas of higher royalty coverage

Exploration Upside

Embedded zero-cost potential growth through meaningful exploration investments across the portfolio by operators

Average expected meters drilled

>550,000m

Shareholders Benefit

Shareholders receive exposure to exploration upside at **no cost**

Further Benefit

- Limited to publicly disclosed drilling plans
- Additional exploration work, mining and geological studies unaccounted for

Strategic Cooperation Agreement

Leading Resource Financier Partnering with Gold Royalty

Taurus Mining Royalty Fund LP

- Global resource sector financier recently expanding into royalty investments through the Taurus Mining Royalty Fund
- The fund is focused on acquiring high quality and sustainable royalty assets across a range of commodities and stages of development.
- Recent investments by the Taurus Mining Royalty Fund include a royalty over Taseko's Florence Copper Project for \$50 million and a portfolio of royalties acquired from Commander Resources
- Examples of other Taurus Funds Management investments include:

Cooperation Agreement Terms

- The three-year agreement provides a framework for cooperation on potential co-investment opportunities.
- The agreement grants each party the right but not the obligation to invest between 25% and 50% in select asset transactions with a value of US\$30 million or more.
- Future dispositions of interests acquired by a co-investment partner through the arrangement will be subject to rights of first offer to the other co-investment partner.

Royalty Model and Streaming Model

Royalty Model

Net Smelter Return (“NSR”) Royalty

- GROY is paid a % of site *revenue* when material is mined and sold from our coverage area
- Royalty is paid on all revenues – primary product and byproducts
- Not impacted by operating cost or capital cost
- Exploration upside (optionality) at no additional cost on our coverage area
- Royalty adheres to land title, survives bankruptcy or asset sale
- Could be acquired directly from operator (eg as part of project financing) or could have been retained by original prospector

Net Profit Interest (“NPI”) Royalty

- GROY is paid a % of site *profit* when material is mined and sold from our coverage area
- Royalty is paid on all profits – primary product and byproducts
- Exploration upside
- Royalty adheres to land title
- Could be acquired directly from operator or could have been retained by original prospector

Streaming Model

- Contract negotiated directly with operator
- GROY is entitled to a portion of production per contract, can be all or a portion of byproduct production; also can be a portion of primary production
- Not impacted by operating cost or capital cost
- Exploration upside (optionality) at no additional cost on our coverage area
- Stream does not adhere to land title – fewer protections in bankruptcy
- Acquired directly from operator (eg as part of project financing)
- May be tax-advantaged if structured through offshore subsidiary. Note that GROY does not structure transactions through this model and therefore is less exposed to potential rising tax rates

Differences Between Royalties and Streams

Criteria	Royalty	Stream
Upfront Payment by Streamer/RoyaltyCo	X	X
Ongoing Payment by Streamer/RoyaltyCo		X
Taxed in Asset / Contract Location	X	*
Contract with Contractual Risks		X
Title / Right to Asset / Property ¹	X	
Information from Operators ²	X	X
Tax Efficiency for Operator		X

*Tax depends on a number of factors, including tax domicile of contracting streamer, where the stream contract is signed etc.

1) Depends on the jurisdiction.

2) May be limited for a royalty; streams usually have more disclosure requirements (LOM plans, other material information)

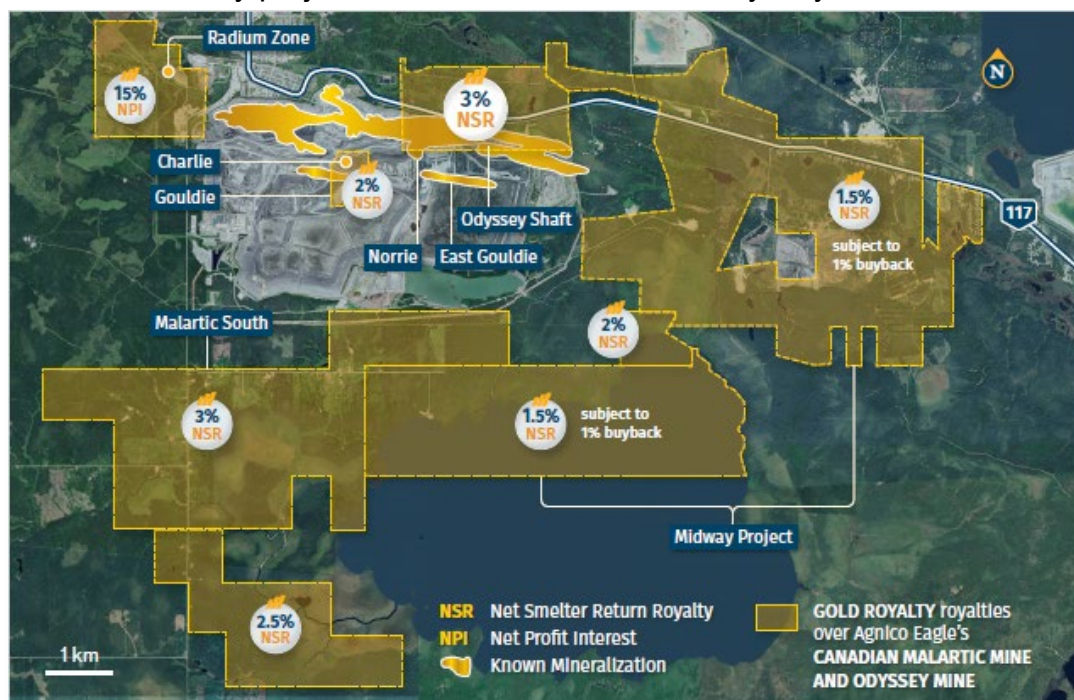

Key Select Asset Overviews

Canadian Malartic

Asset and Royalty Overview

Coverage Summary

- ✓ 3% NSR over the Odyssey North deposit, the majority of the East Malartic deposit, and a portion of the Odyssey South deposit and the Norrie Zone
- ✓ 1.5% NSR over the Midway project which lies to the east of Odyssey and south of the Camflo Mine

- Transitioning from the largest open-pit gold mine in Canada to the largest underground gold mine in Canada
- Mill expected to have ~40,000 tpd excess capacity starting in 2028, potential to fill excess capacity through near-mine targets and regional pipeline projects
- Potential for additional production from Odyssey Internal Zones 2026-2028

Odyssey

Cornerstone Royalty on One of Canada's Largest Gold Mines

Royalty Overview

Operator	
Location	Québec, Canada
Gold Royalty Interest	3% NSR over northern part of the Odyssey Project and other surrounding royalties
Commodities	Au
Asset Stage	Production
Expected Production	500-600 koz per year ⁽¹⁾
Life of Mine	Mine life to at least 2042 - based on approx. half of current resources ⁽²⁾
Mineral Resources ⁽²⁾	P&P: 7,497 koz (127.5 Mt @ 1.83 g/t) M&I: 3,232 koz (52.9 Mt @ 1.90 g/t) Inferred: 9,857 koz (144.3 Mt @ 2.12 g/t)

1) Based on Agnico Eagle Press Release dated June 20, 2023.
2) Agnico Eagle's Mineral Reserves & Resources Statement effective December 31, 2024.

Odyssey

Significant Resource Growth and Continued Exploration

Recent Updates

Mineral Resource Estimate⁽¹⁾:

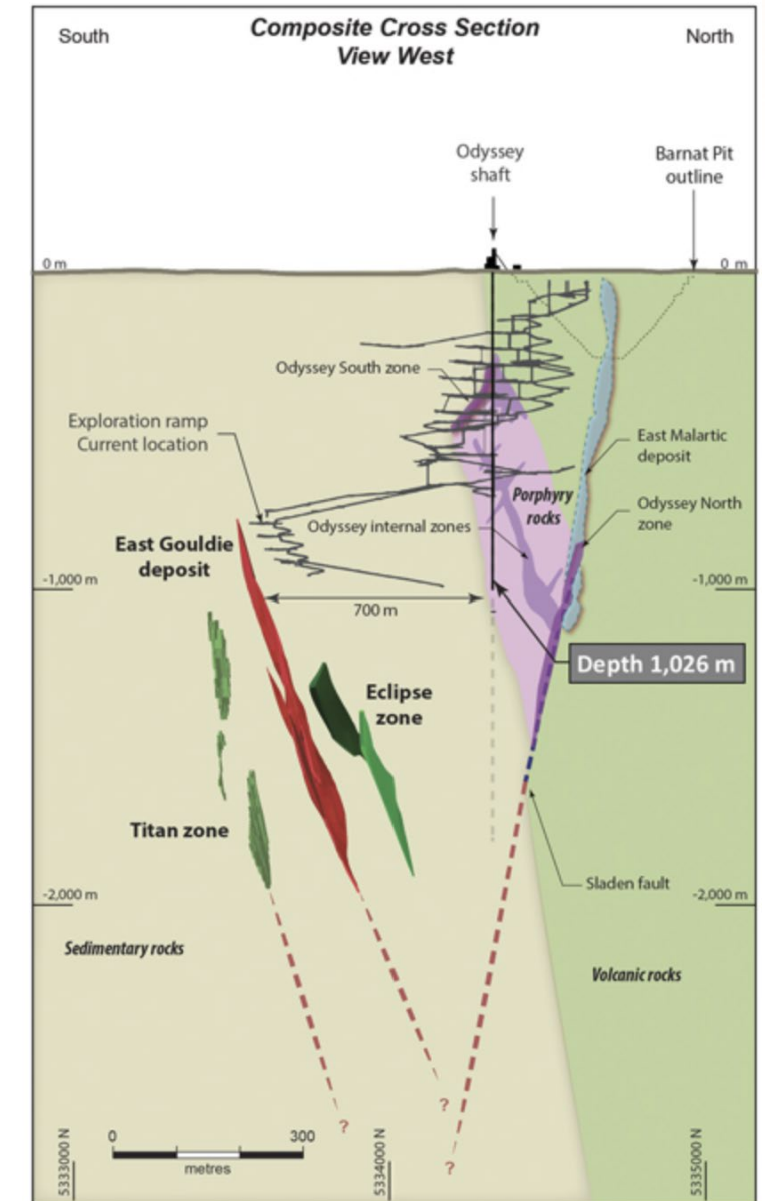

- Over 1.3Moz added to the total resource of East Malartic relative to last year's total resource, with an increase of over 2.1Moz in Indicated Resources from increased conversion of Inferred Resources

Development⁽²⁾:

- Ramp development, shaft sinking activities and surface construction progressed on schedule
- Shaft reached a depth of 1,026 metres at level 102 during Q4 2024
- Agnico Eagle has outlined potential for a second shaft at Odyssey to aid in its "Fill the Mill" strategy

Exploration⁽²⁾:

- Exploration at the Odyssey mine for 2025 consists of approximately \$29.7 million for 176,300 metres with the aim to continue conversion of Inferred Resources to Indicated Resources at East Gouldie and Odyssey deposits and expanding the footprint of East Gouldie
- An additional \$10.4 million is expected to be spent on 40,000 metres of exploration drilling into Barnat and East Gouldie mineralized corridors on the Canadian Malartic, Rand Malartic and Midway properties

Illustrative Investment GEO Profile based on Borborema Feasibility Study⁽²⁾

1) Refer to Gold Royalty Annual Information Form for the year ended December 31, 2023.
2) The GEO profile chart represents an illustrative scenario that applies the 2% royalty rate to the base case production estimates of Aura Minerals as set out in the feasibility study for the Borborema project. The scenario is provided for informative purposes and that actual forecasts and result will differ. Refer to technical report for further information. The Royalty will decrease to a 0.5% NSR royalty after 725,000 ounces of payable gold are produced from the Borborema Project.
3) Borborema expected commercial production as disclosed by Aura Minerals in a news release dated February 15, 2024.

Cozamin Copper-Silver Mine

Immediate Cashflow from a High-Quality Operation
