On July 26, MAG Silver announced its 2Q23 production results. During the quarter, MAG continued to see strong progress given its ramp-up of operations at Juanicipio. In turn, Fresnillo (FRES.L; not rated) reported that 377,018 tonnes (t) of ore (+70% QoQ) was processed through the Juanicipio, Saucito, and Fresnillo plants at an impressive average silver grade of 498 grams per tonne (+37% QoQ). As a result, total production before offtake adjustments totaled 5.3M ounces (oz) of silver (+134% QoQ), 10,639oz of gold (+76% QoQ), 3,402t of lead, and 5,418t of zinc.

Steady ramp-up progress continues toward full capacity. We highlight that the quarter has shown strong progress while milling activities ultimately continued as planned. We also stress that the Juanicipio mill ramped up to about 85% of its 4,000 tonne per day design capacity, while reaching commercial production on June 1, 2023. Looking ahead, the project is expected to reach its full production figure by 3Q23.

Precious metal price deck revision. We believe it is prudent to update our forward-looking precious metal price deck given continued strength in commodity pricing. We base this decision on various ongoing macroeconomic developments, which have spurred increases in gold and silver prices of about 15% and 34% over the past 12 months, respectively. Importantly, our revised estimates consider the ongoing inflationary environment, continued investment in safe-haven assets, and recessionary concerns. In addition, we also recognize that precious metals may benefit from a potential leveling off from current interest rates.

We are revising our gold and silver prices upward. We now utilize an updated price deck of \$1,900/oz of gold and \$25/oz of silver. We plan to apply these figures across our coverage universe to all metals and mining research reports as of June 15, 2023, based on the recent momentum seen in precious metal prices. Notably, these figures compare quite favorably to our previous price deck that implied longterm pricing of \$1,750/oz of gold and \$19/oz of silver, respectively. Our new estimates therefore represent price increases of 9% for gold and 32% for silver.

We reiterate our Buy rating on shares of MAG Silver while increasing our PT to \$20.50 from \$16.00. Our higher PT is directly related to the aforementioned upward revisions to our silver and gold price decks. Our overall valuation for Juanicipio remains based on a DCF of operations while utilizing an unchanged 7.0% discount rate. We note that this figure remains slightly lower than the discount rates applied to most other Mexican assets throughout our coverage universe. Longer-term, however, we still believe that our lower discount rate accurately accounts for MAG's high-grade orebody, profitable joint venture agreement, and extensive production potential.

. MainDrig

Near-term catalysts. Looking ahead, we expect Juanicipio's ramp-up to full capacity to remain on track for 3Q23. MAG's management team also maintains their concurrent focus on continued advancement of the Larder and Deer Trail properties. At present, the Larder project remains fully permitted for exploration as drilling is ongoing. We emphasize that mineralization at the site remains unconstrained at depth and that Larder sits on trend between the Kerr Addison, Upper Beaver, and Kirkland Lake projects. For now, MAG has planned 5,000 meters of drilling as part of its Phase 2 program at Deer Trail. Additionally, we note that Phase 1 has been successful in delineating a variety of deposit characteristics. This includes the location of the Redwall Limestone, known feeder zones, and mineralization at depth. Going forward, we believe that MAG continues to utilize its strong technical expertise and exploration prowess in defining a novel gold deposit. In conclusion, it is our view that Larder and Deer Trail may ultimately offer high-grade opportunities within geopolitically favorable jurisdictions.

Risks. (1) Commodity price risk; (2) increase in capital through commissioning of Juanicipio; (3) operating and technical risks; (4) political risk; and (5) JV-related risks.

H.C. WAINWRIGHT & CO, LLC RATING SYSTEM: H.C. Wainwright employs a three tier rating system for evaluating both the potential return and risk associated with owning common equity shares of rated firms. The expected return of any given equity is measured on a RELATIVE basis of other companies in the same sector. The price objective is calculated to estimate the potential movements in price that a given equity could reach provided certain targets are met over a defined time horizon. Price objectives are subject to external factors including industry events and market volatility.

RETURN ASSESSMENT

Market Outperform (Buy): The common stock of the company is expected to outperform a passive index comprised of all the common stock of companies within the same sector.

Market Perform (Neutral): The common stock of the company is expected to mimic the performance of a passive index comprised of all the common stock of companies within the same sector.

Market Underperform (Sell): The common stock of the company is expected to underperform a passive index comprised of all the common stock of companies within the same sector.

Investment Banking Services include, but are not limited to, acting as a manager/co-manager in the underwriting or placement of securities, acting as financial advisor, and/or providing corporate finance or capital markets-related services to a company or one of its affiliates or subsidiaries within the past 12 months.
