## FORWARD LOOKING STATEMENTS

Certain statements and information contained or incorporated by reference in this presentation constitute "forward-looking information" and "forward-looking statements" within the meaning of applicable Canadian and United States securities legislation (collectively, "forward-looking statements"). These statements relate to future events or our future performance. The use of words such as "anticipates", "believes", "proposes", "contemplates", "generates", "progressing towards", "in search of", "targets", "is projected", "plans to", "is planned", "considers", "estimates", "expected", "often", "likely", "potential" and similar expressions, or statements that certain actions, events or results "may", "might", "wull", "could", or "would" be taken, achieved, or occur, may identify forward-looking statements. All statements other than statements of historical fact are forward-looking statements. Such forward-looking statements are based on material factors and/or assumptions which include, but are not limited to, the estimation of Mineral Resources and Mineral Resources on the exploration of Mineral Resources on the care forward-looking statements relates for fraude December 31, 2022, its most recently filed interim MD&A, and the Company's Annual Information Form ("AIF") dated March 22, 2023. Such forward-looking statements represent the Company's management expectations, estimates and assumptions that, while considered reasonable by the Company as of the date hereof, are not guarantees of future events or circumstances on the date the statements are made, and are subject to significant operational, business, economic, and regulatory risks and uncertainties. The risks and uncertainties that may affect the forward-looking statements aversely in exolor in subject to significant operational, business, including previnting and

Readers should not place undue reliance on such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made and the Company does not undertake any obligations to update and/or revise any forward-looking statements except as required by applicable securities laws.

#### Cautionary note to U.S. Investors concerning estimates of Mineral Reserves and Mineral Resources

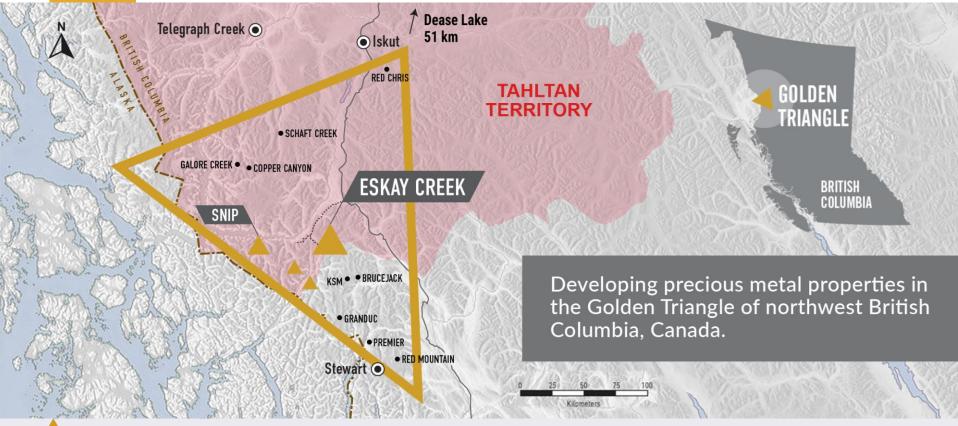

Skeena's Mineral Reserves and Mineral Resources included or incorporated by reference herein have been estimated in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") as required by Canadian securities regulatory authorities, which differ from the requirements of U.S. securities laws. The terms "Mineral Reserve", "Proven Mineral Reserve", "Probable Mineral Reserve", "Mineral Resource", "Measured Mineral Resource", "Indicated Mineral Resource" and "Inferred Mineral Resource" are defined in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") "CIM Definition Standards – For Mineral Resources and Mineral Reserves" adopted by the CIM Council (as amended, the "CIM Definition Standards"). These standards differ significantly from the mineral property disclosure requirements of the U.S. Securities and Exchange Commission in Regulation S-K Subpart 1300 (the "SEC Modernization Rules"). Skeena is not currently subject to the SEC Modernization Rules. Accordingly, Skeena's disclosure of mineralization and other technical information may differ significantly from the information nuder the SEC Modernization Rules.

In addition, investors are cautioned not to assume that any part, or all of, Skeena's mineral deposits categorized as "Inferred Mineral Resources" or "Indicated Mineral Resources" will ever be converted into Mineral Reserves. "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and a great amount of uncertainty as to their economic and legal feasibility. Accordingly, investors are cautioned not to assume that any "Inferred Mineral Resources" that Skeena reports are or will be economically or legally mineable. Under Canadian securities laws, estimates of "Inferred Mineral Resources" may not form the basis of feasibility or prefeasibility studies, except for a Preliminary Economic Assessment as defined under NI 43-101.

For these reasons, the Mineral Reserve and Mineral Resource estimates and related information presented herein may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the U.S. federal securities laws and the rules and regulations thereunder.

# INFRASTRUCTURE in the Golden Triangle

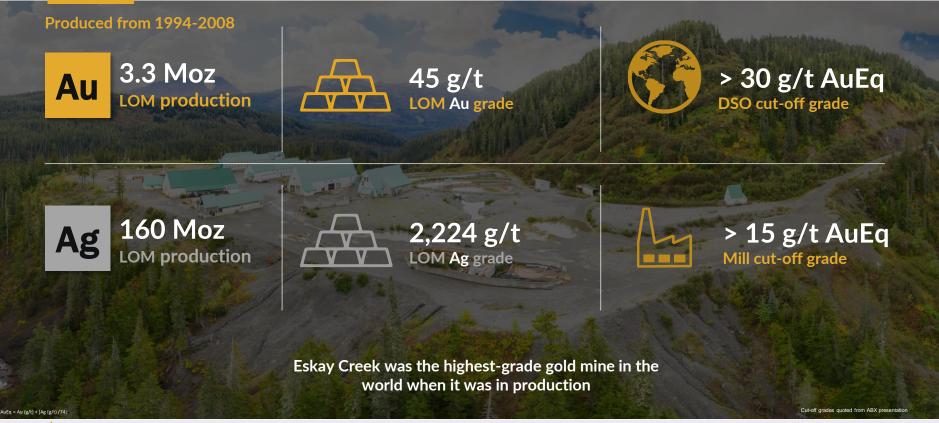

# Excellent Access to Power and Infrastructure:

- Highway 37 paved north from Smithers and gravel road into Eskay Creek
- New 287 kV power line
- Forrest Kerr & McLymont Creek
   Power Station within 17 km of Snip
- Volcano Creek Power Station within 17 km of Eskay Creek
- Over \$2 billion invested in infrastructure

## ESKAY CREEK HISTORICAL PRODUCTION

## PIT CONSTRAINED 2023 RESOURCES & RESERVES

	A STANDARD	Grade			Contained Ounces		
1 42	Tonnes (Mt)	AuEq g/t	Au g/t	Ag g/t	AuEq (Moz)	Au (Moz)	Ag (Moz)
2023 RESERVES	1 3 7/3	and the	No Con	1 State	A Providence		A March

Probable	11.9	2.3	1.8	40.1	0.9	0.7	15.3
Total Reserves	39.8	3.6	2.6	68.7	4.6	3.3	88.0
2023 RESOURCES		AND	10		and the second		
Measured	27.8	4.6	3.3	87.9	4.1	3.0	78.6
Indicated	22.3	2.1	1.6	32.0	1.5	1.1	22.9
Total M + I	50.1	3.4	2.6	63.0	5.5	4.1	101.4

Note: This Mineral Reserve estimate has an effective date of November 14, 2023 and is based on the Mineral Resource estimate dated June 20, 2023 for Skeena Resources by GRE. The Mineral Reserve estimate was completed under the supervision of Terre Lane, Principal Mining Engineer of GRE, who is a Qualified Person as defined under NI 43-101. Mineral Reserves are stated within the final design pit based on a US\$1700/cz giver price. An NSR cutoff of C\$24.451 was used to estimate Mineral Reserves based on preliminary processing costs of \$18.221 ore and G&A costs of C\$5.231 ore. Gold and silver recoveries were 83% and 91%, respectively during the LOM scheduling. AuEq = (Au (gr) \* 1700 \* 0.83) + (Ag (gr) \* 23 \* 0.91)/(1700 \* 0.83). Final operating costs within the pit design were C\$3.001 mined, with associated processed of \$18.241 ore processed.

Pit constrained resources are quoted at a 0.7 g/t AuEq cut-off.

AuEq = ((Au(g/t)\*1700\*0.84) + (Ag(g/t)\*23\*0.88)) / (1700\*0.84). Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resources estimated will be converted into mineral reserves.

Resources are reported in-situ and undiluted for both pit constrained and underground scenarios and are considered to have reasonable prospects for economic extraction.

In accordance with NI 43-101 recommendations, the number of metric tonnes was rounded to the nearest thousand. Any discrepancies in the totals are due to rounding effects

Mineral Reserves are stated within the final design pit based on a US\$1,700/oz gold price and US\$23.00/oz silver price. An NSR cut-off of C\$24.45/t was used to estimate Mineral Reserves based on preliminary processing costs of \$18.22/t ore and G&A costs of C\$6.23/t ore. Gold and silver recoveries were 83% and 91%, respectively during the LOM scheduling. AuEq = ((Au (g/t) \* 1700 \* 0.83) + (Ag (g/t) \* 23 \* 0.91))/(1700 \* 0.83)

## WHAT DIFFERENTIATES ESKAY CREEK?

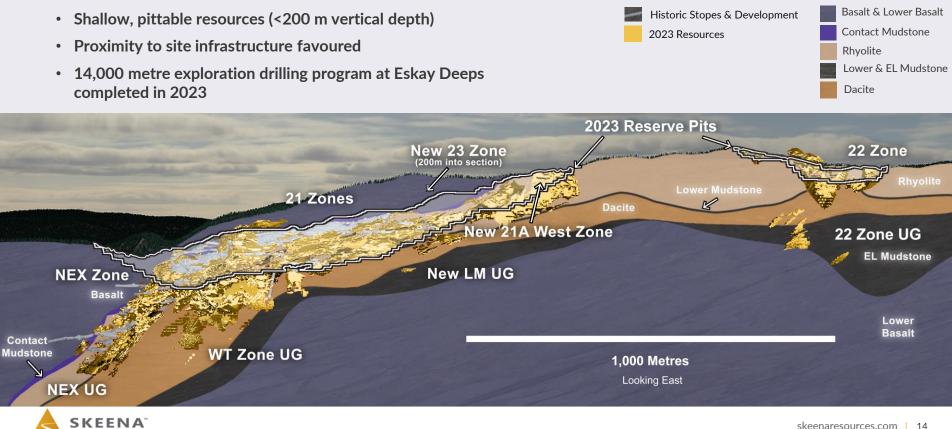

- Brownfields site with previous operations from 1994 to 2008 with many existing permits
- High grade ore results in robust economics even with low metals prices
- Short distance to low-cost hydro power (17km)
- Low earthworks requirements compared to other open-pit development projects

- Excellent jurisdiction with skilled labour
- Tahltan First Nation investment and support
- Significant existing infrastructure, including a fully permitted TSF, camp, offices & roads
- Exploration open to the North, South & at depth

## NEAR MINE UPSIDE POTENTIAL **Eskay Creek**

# SNIP

## **SNIP 2023 UPDATED MINERAL RESOURCE ESTIMATE**

- Skeena acquired 100% of Snip in 2017 from Barrick
- Snip has a historical production of 1.1Moz @ 27.5 g/t Au & includes 8,435 metres of existing underground workings
- 2023 MRE demonstrates an increase of 579,000 Au ounces from 2020 MRE

		Grade	<b>Contained Ounces</b>		
	Tonnes (000)	Au g/t	Au oz (000)		
INDICATED MINERAL RESOURCES					
Main - V	850	9.59	262		
Main – S	1,718	9.28	513		
Twin West	171	8.69	48		
Total Indicated	2,739	9.35	823		
INFERRED MINERAL RESOURCES					
Main – V	115	7.38	27		
Main – S	323	6.22	65		
Twin West	61	11.02	22		
Total Inferred	499	7.10	114		

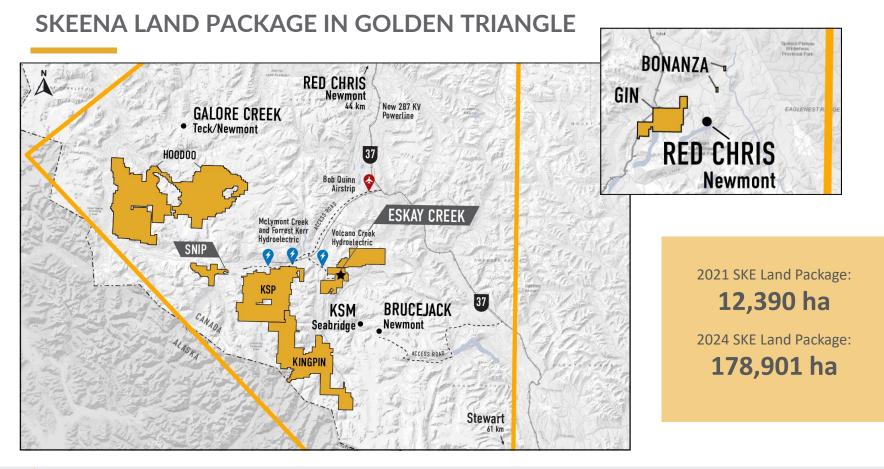

The underground cut-off grade for the long hole mining method was calculated to be 2.5 g/t Au.

Resources are reported in-situ and undiluted within potentially economical and minable underground long hole stope shapes.

 Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resources estimated will be converted into mineral reserves

 In accordance with NI 43-101 recommendations, the number of metric tonnes and ounces were rounded to the nearest thousand. Any discrepancies in the totals are due to rounding effects
